

MySQL Enterprise by Novell®

Novell and MySQL AB have partnered to offer you MySQL Enterprise by Novell®. You'll get all the benefits of the MySQL* database backed by worldwide enterprise-class support from Novell. With this powerful, affordable database and a robust service package at your fingertips, you'll develop and deploy successful database solutions that set your business apart.

MySQL and Novell: Open Technology, Unmatched Support

The open source MySQL database provides a robust, viable alternative to the traditional—and expensive—database offerings on the market. And now, to further reduce the total cost of ownership for your enterprise, Novell offers world-class support from expert Novell technicians and a proven, indispensable development package for MySQL database solutions. Under the only agreement of its kind between a Linux* vendor and MySQL AB, Novell delivers MySQL Enterprise by Novell, a subscription service that combines the superior MySQL database software with this comprehensive service and support from Novell.

Novell provides support for all your application-development needs, whether you're using PHP, Perl, Java*, Visual Basic, .NET or any other development tools with the MySQL database. As a result, you can confidently develop and deploy a secure and scalable open source database for your IT infrastructure.

Stay Competitive and Compatible

Known for high-speed performance, ease of use, exceptional security and scalability, and uptime 24x7, MySQL is the world's most popular open source database for enterprise-class deployments; more than 40,000 downloads occur daily, and its 6 million active installations include Associated Press, Craigslist, Google, Lufthansa, NASA, Sabre Holdings, Suzuki, Yahoo and many more. With MySQL, you can deploy robust and scalable business solutions, including e-commerce, Online Transaction Processing (OLTP) and data warehousing applications. Compatible and customizable, MySQL runs on more than 20 platforms, including Linux and NetWare®.

Rely on Industry-leading Support

With worldwide support operations—and more than 20 years' experience as an enterprise solutions provider—Novell has both the capacity and the knowledge to deliver enterprise-class support to MySQL users. Novell is the first and only Linux infrastructure vendor to offer this level of support
