PRODUCT FLYER

The Novell® one Net vision is about enabling people to work together, work smarter and work from anywhere. Today, that means extending your network beyond traditional desktop and laptop computer users to your mobile workforce. These mobile employees rely on personal digital assistants (PDAs) such as the HP iPAQ* and Dell Axim* Pocket PCs to stay organized and productive. Pocket PC devices are among the most connected PDAs available. Now, you can make your mobile workers more productive than ever by giving them secure access to GroupWise® right from their Pocket PCs.

ALLIANCES THAT KEEP PEOPLE IN TOUCH AND INFORMED

Novell has partnered with the industry's leading providers of mobile and wireless solutions to extend GroupWise access to iPAQ, Axim and other PDAs that run Microsoft® Pocket PC Software 2002. These partnerships are delivering the security, mobility, productivity and low cost of ownership that businesses need for success in the Net economy.

Jarna mobile solutions provide a rich set of both personal and collaborative capabilities. Jarna solutions include such features as message routing based on user preferences, corporate authentication, strong encryption, offline data access and wireless operation for both synchronization and device administration. A comprehensive administrative console minimizes deployment time and reduces maintenance complexity.

NotifyLink* from Notify Technology Corporation gives mobile professionals real-time "Over-the-Air" Synchronization and "Push Notification" of their e-mail, calendar, contacts and tasks. Users can read, compose, reply, forward and delete e-mail messages from a wireless two-way device. The NotifyLink Solution supports multiple wireless two-way devices, multiple networks, control of global settings, high-level security, encryption and synchronization.

SECURITY YOU CAN COUNT ON

GroupWise gives you the best security available—not only for employees at headquarters, but also for people who connect from outside the firewall. GroupWise supports open security standards, so you can maintain secure, authenticated communications both internally and externally. Pocket PC integration solutions from our partners

N

With Novell partner solutions, GroupWise customers can deliver secure, mobile access to GroupWise right from Pocket PC PDAs. The result: enhanced productivity for the mobile workforce and increased return on their investment in GroupWise.

Novell®

take advantage of industry-standard security technology to protect information that goes through the GroupWise system to PDAs, so you know that critical information is protected.

PRODUCTIVITY GAINS FOR HIGHER PROFITABILITY

GroupWise communication and collaboration tools keep people in touch and informed, so they can work together with optimum efficiency. And Novell partner products give people on the go easy access to these tools when they are away from the office. By combining the power of GroupWise and the Pocket PC you can realize significant productivity gains that increase employee satisfaction and make your business more profitable.

LOWER OWNERSHIP COSTS

GroupWise already offers the lowest cost per user of any of the leading communication and collaboration solutions. And Novell's aggressive pricing for Web- and wireless-only licenses enables

you to extend access to mobile employees at a very affordable price. GroupWise is highly efficient, enabling you to support many more users on a single server than with competing solutions. So even if you have a large mobile workforce, you can minimize hardware acquisition, deployment and administrative costs.

With the addition of Novell ZENworks® for Handhelds, you get automated management for your growing population of handheld devices. ZENworks helps you reduce ownership costs, strengthen corporate data security and increase productivity for your mobile workforce.

NOVELL NTERPRISE™— BUSINESS IN MOTION
