About This Document

Each Utopia Demo will have two or three pieces of documentation, to be used as follows:

1. Use this Quickstart to prepare for your demo meeting. It includes everything you need to know to get the right virtual machines started and ready to begin showing the solution. Use this quickstart if you are building the demo locally on your own hardware or if you are accessing a pre-built version on the Novell Online Demo System (NODS)
2. Once your demo virtual machines are started and at the right place you're ready to begin your demo. If you know the products and your customer's requirements then you can go ahead and deliver your own demo using the system. However if you would like further instructions then the Tutorial will give you a guide of how to drive the demo.
3. In some cases a third piece - a Sample Demo is provided, which gives an illustration of how the solution might be shown to a customer.
4. For online copies of all these documents please visit <http://www.novell.com/partners/demosystems>

Demo Synopsis

This demo is based on on a single SLES10 SP2 server running PlateSpin Orchestrate from Novell version 2.0.1. You will be able to demonstrate the following

- Launch virtual application that have been created

Setup Instructions

Virtual Machines

PSOHeatmaputpJuly09.rar			
IP address	Memory	Disk Space	DVD #
172.17.2.61	2048 MB	5.6 GB	1b

User ID's

u:root p:n0v3ll

u:bob p:novell

u:tina p:novell

Useful URLs

Preparing The Demo

1. Extract the PSOHeatmaputpJuly09.part0x.rar set of files to a directory of your choice and start the vm using vmware
2. Start the vm and login as root / n0v3ll
3. Start the PlateSpin Orchestrate Developer Client and login into the Grid

- 3.1. Click on the Grid name and accept the default login credentials
4. You are now ready to demo. Watch or download the TUTPSOHeatmap.swf

Notes / Issues

- The license file assigned to this demo expires on 1st Jan 2010
- If after vm extraction you cannot login to the PlateSpin Orchestrate Development client, check your network card is active and configured. The IP address should be 172.17.2.61 / 255.255.255.0

Where next?

1. Visit our documentation site at <http://www.novell.com/partners/demosystems> and navigate to the demo you are preparing
2. Watch the Tutorial for your demo
3. Watch the Sample Demo if one is provided
4. In case of any issues please post your query to the support forum at <http://forums.novell.com/novell-product-support-forums/utopia/>
