

Endpoint Management ZENworks Application Virtualization v8.0.1

Chris Gacesa
CGacesa@novell.com

About This Document

Each Demo will have two or three pieces of documentation, to be used as follows:

1. Use this Quickstart to prepare for your demo meeting. It includes everything you need to know to get the right virtual machines started and ready to begin showing the solution. Use this Quickstart if you are building the demo locally on your own hardware or if you are accessing a pre-built version on the Novell Online Demo System (NODS)
2. Once your demo virtual machines are started and at the right place you're ready to begin your demo. If you know the products and your customer's requirements then you can go ahead and deliver your own demo using the system. However if you would like further instructions then the Tutorial will give you a guide of how to drive the demo.
3. In some cases a third piece - a Sample Demo is provided, which gives an illustration of how the solution might be shown to a customer.
4. For online copies of all these documents please visit the [Novell Demo Systems Portal](#).

Brief Description

This demo is based on a single Microsoft Windows 7 Enterprise Edition workstation running ZENworks Application Virtualization v8.01 (powered by Xenocode) and an Apache Web Server for streaming of Virtual Applications (powered by Spoon). You will be able to demonstrate the following:

- Launching of virtual applications that have been created (running Internet Explorer 6 on Windows 7)
- Creating of simple virtual Applications using built in Templates (Internet Explorer 6)
- Creating Components (Silverlight) to simply add to an existing Virtual Application (Firefox 3.5)
- Profiling and Modeling Virtual Applications for publishing to the Pre-built Streaming Web Site
- Creating Streaming Application Certificates for individual Virtual Applications
- Stream Virtual Applications (Internet Explorer, Firefox and GroupWise)

Setup Instructions

Virtual Machines

ZAVwin7UTP			
IP address	Memory	Disk Space	Creation Date
172.17.2.57	2048	40 GB	August 2010

User ID's

As this is a Microsoft Windows 7 machine, the Administrator account does not get created, however the following User's are both Administrative users.

u:bob p:novell

u:tina p:novell

Useful URLs

The Streaming Web site is set as the Homepage, which is;

<http://zavwebutp.utopia.novell.com/spoon/>

To demonstrate Silverlight integration, go to this URL (bookmarked in Firefox);

<http://www.microsoft.com/silverlight>

Preparing The Demo

Extract the ZAVwin7UTPAug10.part0x.rar set of files to a directory of your choice and start the VM using VMware

- Login as either Bob or Tina
- All the directory structures for running this demo have been created
- To demo this solution, watch the flash tutorial for ZENworks Application Virtualization

Notes / Issues

All virtual applications created on the vm uses an Internal License specifically assigned to the Novell Demo System. Use of these virtual applications on systems other than the Novell Demo System is strictly prohibited.

Where next?

- Visit our documentation site at <http://www.novell.com/communities/demosystems/endpoint-management/zav>
- Watch the Flash Tutorial for your demo or read the demo script, where provided.
- Watch the Sample Flash Demo if one is provided.
- In case of any issues please post your query to the support forum at <http://forums.novell.com/novell-product-support-forums/utopia/>
