

# Endpoint Management ZENworks Patch Management

Bhogilal Hirani  
BHirani@Novell.COM

## About this Document

Each Utopia Demo will have two or three pieces of documentation, to be used as follows:

1. Use this Quickstart to prepare for your demo meeting. It includes everything you need to know to get the right virtual machines started and ready to begin showing the solution. Use this quickstart if you are building the demo locally on your own hardware or if you are accessing a pre-built version on the Novell Online Demo System (NODS)
2. Once your demo virtual machines are started and at the right place you're ready to begin your demo. If you know the products and your customer's requirements then you can go ahead and deliver your own demo using the system. However if you would like further instructions then the Tutorial will give you a guide of how to drive the demo.
3. In some cases a third piece - a Sample Demo is provided, which gives an illustration of how the solution might be shown to a customer.
4. For online copies of all these documents please visit <http://www.novell.com/partners/demosystems>

## Demo Synopsis

This demo is based on the following virtual machines

- ZPMw2k3utp – ZPM 6.4 powered by Lumension
- zpmxputp – XP client

You will be able to demonstrate the following

- Administrative console – Dashboard overview
- Vulnerability assesment
- Identifying and Deploying Applicable vulnerabilities
- Groups and Mandatory baselines
- User Management : Roles

## Setup Instructions

### Virtual Machines

ZPMw2k3utp			
IP address	Memory	Disk Space	DVD #
172.17.2.55	1536 MB	12.3 GB	3g

ZPMxputp			
IP address	Memory	Disk Space	DVD #
172.17.2.132	380 MB	2.2 GB	PartnerTools

#### User ID's

u:Administrator p:n0v3ll

u:bob p:novell

u:tina p:novell

#### Useful URLs

<http://zpmw2k3utp>

### Preparing The Demo

- Extract the zpmw2k3utp and zcmxputp RAR set of files to a directories of your choice and start the vm using vmware
- To the ZPM server login as Administrator/n0v3ll and on the xp workstation login as bob/novell
- On the zpmw2k3utp server start the Novell ZENworks Patch Management Server console from the shortcut on the Desktop. Login to the console as **Patchlink/n0v3ll**
  - If your DNS is not configured or working correctly, then you may will need to use the IP Address to start the management console I.e <http://172.17.2.55>
- Check that the xp workstation and the ZPM server have a status of "Idle". You many need to restart the agent on each of the vms. The Vista vm will be offline as this vms is not supplied and intended for demo purposes only.

### Notes / Issues

- You will require a minimum of 2 GB RAM for the vms. If you have more than the required RAM, adjust the momory allocation to each vm accordingly

### Where next?

- Visit our documentation site at <http://www.novell.com/partners/demosystems> and navigate to the demo you are preparing
- Watch the Tutorial for your demo
- Watch the Sample Demo if one is provided
- In case of any issues please post your query to the support forum at <http://forums.novell.com/novell-product-support-forums/utopia/>
