Quickstart

About this Document

Each Utopia Demo will have two or three pieces of documentation, to be used as follows:

1. Use this Quickstart to prepare for your demo meeting. It includes everything you need to know to get the right virtual machines started and ready to begin showing the solution. Use this quickstart if you are building the demo locally on your own hardware or if you are accessing a pre-built version on the Novell Online Demo System (NODS)
2. Once your demo virtual machines are started and at the right place you're ready to begin your demo. If you know the products and your customer's requirements then you can go ahead and deliver your own demo using the system. However if you would like further instructions then the Tutorial will give you a guide of how to drive the demo.
3. In some cases a third piece - a Sample Demo is provided, which gives an illustration of how the solution might be shown to a customer.

For online copies visit: <http://www.novell.com/communities/demosystems/NOCDemo>

Demo Synopsis

The demo is built in a way you can demonstrate PlateSpin Forge using a demo database.

- PlateSpin Forge 3.1.0.3050

Setup Instructions

Virtual Machines

PSForge (PSForgeAug11)		
IP Address	Memory	Disk Space
172.17.2.33	2048	10GB

User ID's

u:Administrator p;p@55w0rd

Preparing The Demo

For the Virtual machine to operate WS2008R2Fullx64EntBaseUTP (WS2008R2Fullx64EntBaseUTPOct10.part01.rar * 03.rar) must be present and must have the same parent directory. Only one instance is required as the base can be shared amongst all Virtual Machines. It is also recommend you flag the base read-only.

Example:

```
\VMware
\VMware\WS2008R2Fullx64EntBaseUTP
\VMware\NOCDemo
\VMware\BSLMUTP
\VMware\PSForgeUTP
```

Notes / Issues

Dependent on the version of VMware you may be required when starting the virtual machines to upgrade VMtools or reboot the VM as new hardware is detected. This is normal as version of VMware virtual hardware changes from version to version.

Where next?

- Visit our documentation site at <http://www.novell.com/communities/demosystemsbook> and navigate to the demo you are preparing
- Video Ref <http://www.novell.com/media/?topic=Two+Minute+Demos>
- In case of any issues please post your query to the support forum at <http://vibe.novell.com/demosupport>
