- Demonstration – managing policies
- Demonstration – basic provisioning
- Demonstration – managing storage
- Demonstration – delegated administration
- Demonstration – self service capabilities
- Demonstration – workflow
- Demonstration – using advanced tools
- Identity Lifecycle Management continuing education, tools and resources

Password Management

- Overview
- Use cases
- Security setting password policies
- Helpdesk resetting password
- End users resetting passwords
- Demonstration – setting password policies
- Demonstration – helpdesk capabilities
- Demonstration – self service capabilities
- Password Management continuing education, tools and resources

Day 1 – Afternoon

Access Management

- Overview
- Use cases
- Controlling Web and J2EE access
- Controlling access across businesses
- Controlling access to client-server applications
- Controlling access to remote users
- Controlling access to physical facilities
- Demonstration – managing access
- Demonstration – federated access
- Demonstration – client-server access management
- Demonstration – Virtual Private Network (VPN)
- Demonstration – managing physical access
- Access Management continuing education, tools and resources

Enterprise Single Sign-on

- Overview
- Use cases
- Managing enterprise-wide policies
- Providing single sign-on for Web sites
- Providing single sign-on for client applications
- Demonstration – setting enterprise policies
- Demonstration – using client
- Demonstration – setting up Web credentials
- Demonstration – setting up client-server credentials
- Demonstration – managing credentials
- Enterprise Single Sign-On continuing education, tools and resources

Day 2 – Morning

Compliance Automation and Validation

- Overview
- Use cases
- Automated provisioning
- Automated enforcement
- On-demand access
- Access monitoring
- Access reporting
- Access remediation
- Demonstration – on-demand access
- Compliance Automation and Validation continuing education, tools and resources

Access Governance

- Overview
- Use cases
- Access certification
- Automated role based provisioning
- Validating access
- Policy and controls automation

Day 2 – Afternoon

Access Governance (Continued)

Demonstration – access certification

Demonstration – automated role based provisioning

Demonstration – validating access

Demonstration – policy and controls automation

Access Governance continuing education, tools and resources

Threat and Vulnerability Management

Overview

Use cases

Demonstration – Threat and Vulnerability Management

Threat and Vulnerability Management continuing education, tools and resources
