

# NOVELL CERTIFIED PROFESSIONAL

George Wesley Johnson III

## Advanced Technical Training Courses

Your job has never been more difficult: Not only do you have to keep up with the latest software updates, new processes, and revised protocols, but you also have to worry about helping your company make the transition to e-business. To help you accelerate your company's transition to e-business and to help you simplify your company's network environment, Novell is delivering Net services software. This software will enable you to create one Net—a secure and efficient foundation for conducting e-business inside, outside, and between companies.

To help you better understand and optimize Net services software from Novell, Novell Education offers Advanced Technical Training (ATT) courses, which provide advanced instruction and hands-on labs. Designed for networking professionals who use Novell products, ATT courses are taught by Novell's in-house engineers who actually support the products.

### SAVE YOUR ORGANIZATION TIME AND MONEY

ATT courses save your company time and money by teaching you how to avoid the most common, time-consuming support headaches. In addition, you learn how to tackle tougher, more advanced issues. By learning how to tackle these tough issues yourself, you can avoid opening technical support incidents, thereby saving your company time, money, and frustration.

### BORDERMANAGER 3.5 INTERNET SOLUTIONS COURSE

The BorderManager 3.5 Internet Solutions course is a two-day course that covers installation, configuration, and troubleshooting techniques for BorderManager Enterprise Edition 3.5. The cost for this course is U.S. \$1,195. The course covers the following:
