

# Net Services Software Goes Mobile

## ZENworks for Desktops 3

ZENworks for Desktops 3 is now available. ZENworks for Desktops 3 simplifies desktop management and securely extends networks by allowing you to manage workstations from a central location. To help you further reduce the cost and time involved in managing workstations, ZENworks for Desktops 3 includes the following e-business enhancements:

- Management of and support for remote and mobile users
- Cross-platform support
- Latest Windows 2000 applications support
- Desktop imaging, which stores images in NDS eDirectory
- Tiered Electronic Distribution (TED), which allows you to automatically deploy applications, patches, and workstation images from a central point to many servers at many sites

ZENworks for Desktops 3 is available through authorized Novell resellers. ZENworks for Desktops 3 licenses cost the same as version 2 licenses with a list price of U.S. \$59 per user license for new software, and upgrades are priced at U.S. \$32 per user license. For more information about ZENworks for Desktops 3, visit Novell's web site ([www.novell.com/products/zenworks/desktops](http://www.novell.com/products/zenworks/desktops)).

## NetWare 6

Novell recently announced the next generation of NetWare, NetWare 6, which will enable companies to manage larger amounts of network-based information storage. For more information about what NetWare 6 will offer, see the related article on page 6.

## Novell Legal

Novell announced the availability of Novell Legal, a new e-business solution

that will accelerate the ability for legal offices to conduct business over the Internet. To produce the first Net services software product specifically tailored to the legal market, Novell partnered with GroupLink, JetForm, Tobit Software, and 2ndC.

Novell Legal allows legal teams of any size to use a paperless electronic office and to collaborate critical data among lawyers, partners, and clients. Novell Legal also provides knowledge-management tools specifically tailored to the legal market to ensure consistency and security.

Novell Legal is available immediately through Novell Consulting. For more information, visit [www.novell.com/consulting/bsol/legal.html](http://www.novell.com/consulting/bsol/legal.html).

## Novell OnDemand

Novell has announced the availability of Novell OnDemand, which enables Internet service providers (ISPs) and application service providers (ASPs) to offer content, such as software and applications, over the Internet on a for-fee basis. ISPs and ASPs—including industry leaders such as Wizmo and Eureka Broadband—are using Novell OnDemand to effectively compete in the one Net economy.

Novell OnDemand licenses are available immediately through Novell's Internet Commercial Service Provider (iCSP) program. This program features consumption-based pricing—service providers incur fees only as users actually purchase content. Under this agreement, OnDemand is listed at U.S. \$1.10 per user per month. For more information about Novell OnDemand, visit [www.novell.com/products/ondemand](http://www.novell.com/products/ondemand).

## Thiokol Propulsion Uses Net Services Software

Thiokol Propulsion—the world leader in solid rocket motors for space, defense, and commercial applications—has chosen Novell's Net services software to simplify the complexities of its existing heterogeneous network. Net services software also

enables Thiokol to securely connect with employees, customers, and partners. For more information, visit [www.novell.com/news/press/archive/2000/09/pr00090.html](http://www.novell.com/news/press/archive/2000/09/pr00090.html).

## Novell GroupWise Wireless 1.1

Novell GroupWise Wireless 1.1—software that provides wireless access to messaging, calendaring, tasks, and address books—is now available. Novell GroupWise Wireless 1.1 delivers anywhere, anytime access to business-critical data through Internet-ready devices.

Novell GroupWise Wireless 1.1 is supported by service providers such as AT&T Wireless Services, Nextel, Sprint PCS, and Verizon Wireless. Using GroupWise WebAccess, Novell GroupWise Wireless 1.1 allows a user to read and reply to messages, accept or decline appointments, search address books, and more.

Licenses for Novell GroupWise Wireless 1.1 are free to customers using the latest version of GroupWise, the Novell GroupWise 5.5 Enhancement Pack. These customers can download Novell GroupWise Wireless 1.1 from [www.novell.com/download](http://www.novell.com/download). For more information about Novell GroupWise Wireless 1.1, visit [www.novell.com/products/wireless](http://www.novell.com/products/wireless).

## Novell's e-Business Security Initiative

In conjunction with a study released by International Data Corp. (IDC), "Managing Secure Business," Novell launched a worldwide e-business security initiative to help companies overcome security challenges. IDC's study explains that e-business companies must invest more in security. Companies can accelerate their transformation to e-business by implementing a security policy around controlled, managed access throughout a distributed environment. For more information about this initiative, visit [www.novell.com/news/press/archive/2000/09/pr00093.html](http://www.novell.com/news/press/archive/2000/09/pr00093.html). ●
