

# News From GroupWise Partners

## NETVISION

NetVision Inc. recently released its new Synchronicity for GroupWise product, which helps administrators synchronize passwords and manage user and group accounts. Synchronicity for GroupWise provides automated password management between NDS eDirectory and GroupWise. In addition, Synchronicity for GroupWise proliferates user and group creations, modifications, and deletions between the two directories without requiring the use of templates.

For more information about Synchronicity for GroupWise, visit [www.netvision.com](http://www.netvision.com).

## NEXIC

Nexic Inc. recently announced the next version of Nexic Symphony, a GroupWise client enhancement product. Code-named *Rhapsody*, this new version is scheduled to be released this month. *Rhapsody* has many new features, including contact management within the GroupWise client and an enhanced user interface for GroupWise.

For more information about Nexic Symphony, visit [www.nexic.com](http://www.nexic.com).

## 2NDC

2ndC DocuWise is integrated document management software that makes everyday document handling easier. Using 2ndC DocuWise, you can integrate GroupWise with any Open Database Connectivity (ODBC)-based ERP system.

2ndC DocuWise is especially useful for organizations with the following needs:

- The need to form a general view of customer-related communication
- The need for simple organization of data
- The need to make workflows easier and homogeneous

For more information about 2ndC DocuWise, visit [www.2ndc.dk](http://www.2ndc.dk).

## BRAINSTORM INC.

Brainstorm Inc., a Novell GroupWise training partner, has just released the

new GroupWise 6 Quick Start Card. This three-page (8 1/2 x 11, front and back) card has enough information to help users start using GroupWise 6. To order the GroupWise 6 Quick Start Card, visit [www.brainstorminc.com/novell/training\\_ref.html](http://www.brainstorminc.com/novell/training_ref.html).

## STACK COMPUTER SOLUTIONS

Stack Computer Solution's GroupWise Footnote is a simple tool that can add automatic signatures to outgoing e-mail messages. GroupWise Footnote can also deny e-mails with specific subject lines. For example, you could have used GroupWise Footnote to deny acceptance of e-mail messages carrying the I LOVE YOU virus.

Footnote will also deny e-mail with other attachments that have extensions such as .exe, .vbs, and so on. Advanced features of Footnote include complete attachment decoding so NetWare Loadable Module (NLM) antivirus scanners such as Sophos or Inoculan can intercept infected files before they get through the GroupWise system.

GroupWise Footnote consists of an easy-to-install server-based NLM that runs alongside the GroupWise Internet Access (GWIA) agent. You can easily change outgoing messages or filtering rules. You simply use the NetWare Administrator (NWADMIN) utility or ConsoleOne to edit the GWIA object in NDS eDirectory.

For more information about GroupWise Footnote or to download a trial version, visit [www.stack.co.uk/footnote](http://www.stack.co.uk/footnote).

## MOTIENT CORPORATION

Motient Corporation owns and operates America's largest wireless data network, providing coverage to more than 220 million people. Motient offers two-way communications solutions. For example, mobile e-mail solution eLink wireless e-mail (which is similar to Motient's BlackBerry) provides GroupWise users with real-time, nationwide e-mail access.

For more information about Motient's offerings and network, visit [www.motient.com](http://www.motient.com) or contact Bob Connery of Motient directly at [bob.connery@motient.com](mailto:bob.connery@motient.com).

## CALEDONIA NETWORK CONSULTING

On August 14, 2001, Novell, Inc. issued a security warning for all sites running GroupWise 5.5 Enhancement Pack and GroupWise 6. To make this patch as painless as possible, Caledonia Network Consulting has developed a *Padlock Implementation Guide*, which helps customers deploy Padlock on their GroupWise systems. This free 30 page guide can be found at <http://support.novell.com/padlock/3party.html> or at [www.caledonia.net/padlock.html](http://www.caledonia.net/padlock.html). If you have not patched your GroupWise site yet, this *must-have* document will guide you through the process.

## TOFFA INTERNATIONAL

SyncWisePro from Toffa International gives users GroupWise in the palm of their hand. SyncWisePro provides comprehensive synchronization between GroupWise and Palm OS-connected organizers. Users can synchronize calendar, task lists, reminder notes, address books, and e-mail messages. Users can also preset e-mail messages and synchronize e-mail messages with personal digital assistants (PDAs). In addition, users can select which address books should be synchronized, can control the speed of the synchronization, and can choose which data is synchronized.

Written specifically for GroupWise, SyncWisePro uses the GroupWise Object API. To receive a free 30-day trial copy of SyncWisePro for GroupWise 6 or 5, visit [www.toffa.com/download.html](http://www.toffa.com/download.html).

## GROUPWISESOLUTIONS.COM

Developed in collaboration with the shopNovell team, GroupWiseSolutions.com was created to provide GroupWise users and administrators with a centralized source of information about third-party add-on products and services that enhance the functionality of GroupWise. If you want to evaluate products, you can instantly download all of the products profiled on this web site. When you're ready to buy, you can purchase permanent licenses 24 hours a day, seven days a week. For more information, visit [www.groupwisesolutions.com](http://www.groupwisesolutions.com). ●
