

News From GroupWise Partners

GROUPWISE WIRELESS TOUR

Novell GroupWise and its wireless partners are demonstrating the newest wireless features of GroupWise 6. The GroupWise Wireless Tour is visiting more than 30 cities this month. During this tour, you can learn to integrate GroupWise and wireless technology with your collaboration infrastructure.

For example, GroupWise wireless partner, Compaq, will demonstrate how you can use its iPAQ to wirelessly access GroupWise accounts. In addition, Motient Technologies will show RIM's Blackberry devices integrated with GroupWise. Other partners will showcase additional wireless technologies, such as wireless printing through fax technology.

For more information about the GroupWise Wireless Tour, visit www.groupwise.com.

GROUPLINK

GroupLink recently announced the release of ContactWise 6, which is Customer Relationship Management (CRM) software that integrates with GroupWise 6.x or 5.x. ContactWise 6 sports a new SQL backend and supports Oracle, MSSQL, DB2, Pervasive.SQL, and other major SQL databases.

ContactWise 6 (Elite version) includes the following enhancements:

- Remote synchronization
- Remote connection through IP
- On-board report-generation tool
- Increased control of label names and support for multiple languages
- Enhanced mail merge options
- Options for add-on processes and utilities such as web-based eCRM interaction, wireless eCRM interaction, web-based Help Desk module, web-based workflow module, and web-based Reporting module

You can download a free version of ContactWise 6 (called *ContactWise VIP*) at www.grouplink.net. ContactWise VIP gives single users almost all of the features

of the full ContactWise 6 Elite version. GroupLink offers an easy and low cost upgrade path to the shared versions of ContactWise.

METASTORM INC.

Metastorm e-work 5.2 is a Business Process Management (BPM) platform that integrates with Novell eDirectory and Novell GroupWise. Metastorm e-work 5.2 is based on a joint business relationship between Novell and Metastorm Inc.

Metastorm e-work 5.2 enables you to build intuitive, flexible, and responsive business applications. Users can then use these applications to participate in e-business processes.

Metastorm e-work 5.2 also enables you to automate processes and eliminate paperwork. As a result, managers and staff can focus on making informed decisions, serving customers, and improving productivity.

Metastorm e-work 5.2 is tightly integrated with Novell eDirectory. As a result, users have access to the most up-to-date information available. In addition, because eDirectory is at the foundation of Metastorm e-work 5.2, you can control access to information.

Metastorm e-work 5.2 is also integrated with GroupWise 6. For example, Metastorm e-work 5.2 includes extensions for GroupWise. These extensions enable Metastorm e-work 5.2 to act as a universal mailbox for e-work items. In addition, users can view e-work tasks using the GroupWise interface.

Metastorm e-work 5.2 includes tools that help you create BPM applications. Metastorm e-work 5.2 also provides a single point of administration. For more information about Metastorm e-work 5.2, visit www.novell.com/products/metastorm.

BEGINFINITE INC.

Beginfinite Inc., a provider of eSecurity solutions for GroupWise, has announced the availability of GroupWise AntiVirus Agent (GWAVA) 1.2. GWAVA 1.2

provides several critical security functions for GroupWise 5.5 or above, including virus protection, attachment blocking, spam prevention, and content filtering.

GWAVA 1.2 can scan both external and internal messages. Since GWAVA runs on your Mail Transfer Agent (MTA) servers, it can enhance your company's existing security and can scale easily in large GroupWise environments.

For more information about GWAVA, visit www.beginfinite.com.

COMPAQ COMPUTER CORP.

One of the best ways to maximize productivity is to enable users to connect to their data through wireless collaboration. Together, GroupWise 6 and Compaq's iPAQ (or any other Wireless Access Protocol [WAP]-enabled device) allow users to access e-mail messages, calendar, task lists, daily notes, and shared discussions.

Compaq also supports Novell's effort to help you provide GroupWise access to all members of your organization. Compaq provides the following benefits for your company's GroupWise system:

- **Experience.** More than 55 percent of Novell GroupWise installations are implemented on Compaq servers. In fact, all of Novell's own mission-critical systems run on Compaq servers.
- **Compaq ProLiant Servers.** Whether you need one processor or eight processors, ProLiant servers offer availability, scalability, reliability, and ease of management.
- **Cross-Trained Technical Support.** More than two-thirds of Compaq Accredited Systems Engineers (ASEs) are also CNEs or Master CNEs.
- **Compaq Global Services.** Compaq is one of the few hardware companies that offers consulting services that range from planning and design to installation and maintenance.
- **Longstanding Partnership With Novell.** Compaq and Novell have an ongoing relationship to ensure that their products work together. ●
