

New From GroupWise Partners

COMPUTHINK

Computhink recently announced that ViewWise Enterprise 5.3 is now shipping. This document-imaging solution is fully integrated with GroupWise 6.

ViewWise Enterprise 5.3 enables you to capture, store, retrieve, display, process, and manage documents in digital form. You can manage imaged documents as regular computer files, and you can also retrieve, print, e-mail, or fax imaged documents.

ViewWise Enterprise 5.3 includes the following features:

- Index mapping of image indices to GroupWise properties
- Navigation of ViewWise image folders and documents within the GroupWise tree
- Automatic synchronization of ViewWise cabinet room with the corresponding GroupWise library
- Ability to search OCR images for GroupWise keywords
- Management using Novell eDirectory User and Group objects
- Support for TWAIN- and ISIS-compliant scanners

For more information or to make arrangements to view an online demonstration, visit the Computhink web site at www.computhink.com.

BEGINFINITE

Beginfinite recently announced the availability of GWAVA 1.3, its eSecurity suite for GroupWise. GWAVA 1.3 includes new features such as a new user interface, improved content filtering, address blocking, and attachment blocking. You can download a 30-day evaluation copy at www.beginfinite.com.

Beginfinite also recently announced a strategic partnership with Amarna Software. As a result of this partnership, Amarna's MTASieve, an antivirus and antispyware utility for GroupWise, has

been discontinued. All MTASieve technology has been incorporated into GWAVA 1.3.

According to Beginfinite, its strategic partnership with Amarna Software will improve customer service for MTA-Sieve users and strengthen the GWAVA product. MTASieve users can obtain technical support and GWAVA upgrades through Beginfinite at www.beginfinite.com.

ADVANSYS

At BrainShare 2002 Salt Lake City, Advansys announced integrated Lightweight Directory Access Protocol (LDAP) support for its Formativ Dynamic Solutions for GroupWise. LDAP support enables Formativ to access GroupWise solutions stored in and distributed via eDirectory without the need for the NetWare client.

Advansys Formativ with LDAP support will be available in Service Pack 1, which Advansys plans to release in late spring. For more information about Advansys Formativ, visit the Advansys web site at www.advansyscorp.com.

THE MESSAGING ARCHITECTS

Instant messaging is great, but what about security? GWPop is a native GroupWise instant messaging system that helps companies communicate and collaborate more effectively, increase office and interoffice communications, and protect proprietary information with advanced encryption and security.

Using the GroupWise Address Books as the basis for its management system, GWPop eliminates the need for you to create a separate user directory for the instant messaging application. In addition, GWPop offers the security benefit of authenticating all connections via eDirectory. Other features include voice chat, presence management, application-sharing, remote control, and RSA-based message encryption.

For more information or to download a free trial of GWPop, visit www.groupwisesolutions.com.

CALEDONIA NETWORK CONSULTING

Caledonia Network Consulting recently released *GroupWise WebAccess and Wireless User's Guide—Complete Site License Version* by Tay Kratzer and Danita Zanré. This 250-page guide focuses on GroupWise WebAccess and GroupWise wireless access on Palm, Windows CE, RIM, and WAP-enabled platforms. Each GroupWise site needs to purchase the publication only once (U.S. \$99), no matter how many copies are needed.

Novell Press' new book *Novell GroupWise Administrator's Guide* by Tay Kratzer is also now shipping. Caledonia Network Consulting has teamed with Kratzer to bring additional value to every purchase of this book. If you order this book from the Caledonia Network Consulting web site at www.caledonia.net/gw6book.html, you will receive a free eGuide supplement written by Kratzer. This offer is available only through Caledonia Network Consulting.

If you are planning an upgrade to GroupWise 6, the *GroupWise 6 Upgrade Guide* by Tay Kratzer and Danita Zanré is a must-have. Available at www.caledonia.net, this eBook will guide you step by step through your upgrade, pointing out possible pitfalls and little known tricks to make your upgrade run smoothly.

NOVELL REBUTS MICROSOFT LIES

Microsoft recently distributed a document that attempts to dissuade users from moving from Exchange 5.5 to GroupWise 6. According to Novell, the document is full of incorrect and misleading information. You can find Novell's response to this document at www.novell.com/products/groupwise/gw_exchange.html. ●
