

Fast Track: Upgrade NetWare® to Novell® Open Enterprise Server

When you upgrade to Novell® Open Enterprise Server, you get all the familiar NetWare® services you've come to depend on. But you also tap into the full power and flexibility of Linux*. And you gain unlimited access to Novell innovations you simply won't find anywhere else. Let Novell Services help you take full advantage of Novell Open Enterprise Server.

NetWare to Novell Open Enterprise Server Fast Track: Your Easiest Path to a Best Practices Deployment

With Novell Open Enterprise Server on Linux, you get all the great services NetWare provided with all the added advantages of the Linux platform. What does that mean for you? A far greater universe of hardware and software options—all at a lower cost. It also means that you get access to the latest trend in IT flexibility and management: virtualization. The market is growing for Linux platforms and its applications, hardware, support and services. You can realize greater efficiencies by migrating to Linux.

But successful business solutions require more than great technology. You also need up-front knowledge and on-site expertise to design a best practices deployment that takes full advantage of Novell Open Enterprise Server. You need training

resources that give your staff the skills they need to succeed with the new solution. And you need ongoing access to support engineers who can resolve issues quickly after your Novell Open Enterprise Server solution is up and running. The Fast Track: Upgrade NetWare to Novell Open Enterprise Server is an affordable Novell service offering that delivers all of these essential elements in one convenient package, so you can move to Novell Open Enterprise Server quickly, confidently and without disruptions.

Bringing the Experts to You

This Fast Track offering starts with a five-day, on-site consulting engagement. Over the course of one work week, a highly qualified consulting expert will work closely with you to assess your organization and prepare you to migrate from NetWare to Novell Open Enterprise Server 2. This engagement includes:
