

Sentinel Log Manager Audit Instructions

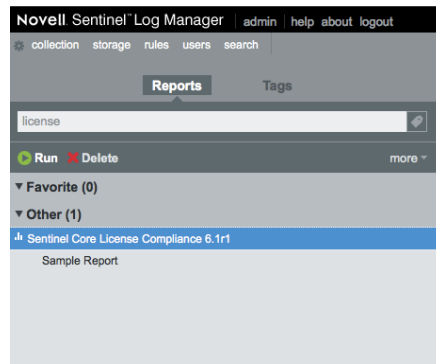

www.novell.com

Generating a Secure Log Manager Audit Report Version 1.1 & above

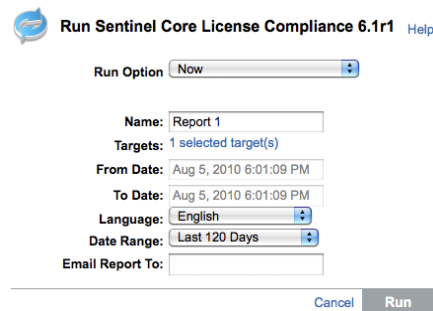

Step 1: Login to the SLM web UI (user interface)

Step 2: Under the report tab, type the following text into the “Find Reports” text field: **license**

Step 3: Select the “Sentinel Core License Compliance” report and click on the Run button:

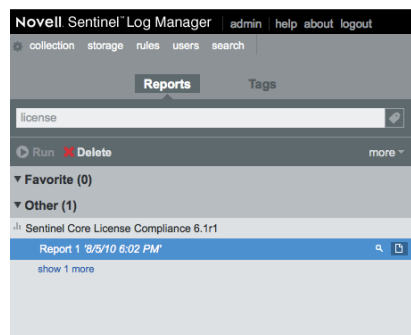

Step 4: A dialog will pop-up with default parameters to use when running the report (Date Range should be set to “Last 120 days”--the default). Assign a specific name to the report, if desired.

Step 5: Click the **Run** button to generate the report

Step 6: The report will appear under the “Sentinel Core License Compliance” report definition entry, when completed:

Step 7: Select the generated report and click on the *view report* button (to the right of the name) to view/save the **pdf**.

Step 8: Repeat process for each and every Sentinel Log Manager (SLM).
