

Novell™ iPrint and PaperCut™

# Comprehensive Enterprise Print Management

Novell iPrint enables self-service printing for desktop and mobile users from a web browser. PaperCut provides tracking, reporting and control of printing on iPrint.

Full cross-platform printing • Track, report on & control printing • Multi-vendor environments

The combination of iPrint and PaperCut gives you room to grow, as well as the flexibility to choose the hardware and software that best meet your needs - without being locked into a single print vendor. For environments running Novell Open Enterprise Server on SUSE Linux Enterprise, PaperCut enhances your control over print management by directly integrating with Novell iPrint and providing native support for Novell eDirectory LDAP schemas.

## Novell iPrint gives you:

- Enterprise-class print solution
- Simple browser-based printer installation on Windows, Macintosh, and Linux desktops
- Central administration for all print devices in a single management console
- Integrated printer push installation for users and groups with auto-update
- Fault tolerance with clustering, load balancing, and printer redirection
- Health monitoring for all of your print devices
- A robust and scalable solution for small to very large organizations

## PaperCut gives you:

- Monitor activity with 50+ pre-built reports
- Implement soft or hard print quotas, limits or charging
- Apply print policies such as encouraging duplex printing via popup warnings
- Implement secure print release and find-me printing
- Optimize printing with rules based routing and redirection scripts
- Receive automatic event alerts such as low toner warnings
- ... and much more

Novell™ iPrint and PaperCut™

# Creating Innovative Printing Solutions

## What PaperCut customers say:

*"I was looking for a print accounting package for Novell iPrint on Open Enterprise Server when I saw PaperCut and decided to download the eval. I install a lot of software all the time and it has been a long time since I installed anything that was so easy to set up, so well documented and so easy to use.*

*Not only does PaperCut support Open Enterprise Server, we can also run the application right on our iPrint cluster, eliminating the need for additional hardware.*

*Support was extremely helpful and responsive in answering any additional questions we had. PaperCut has all the features we need and more, it took us all but 10 minutes to decide to purchase it."*

Frank, East Coast Utility, USA

## What Novell iPrint customers say:

*"We found iPrint to be the most flexible and advanced network printing solution available, filling almost every use case we have thrown at it. When looking for an accounting system to compliment it, we found only PaperCut matched the flexibility and advanced capabilities that we came to expect from iPrint.*

*Together they make an exceptional team! The PaperCut features extend well beyond just print accounting, and with the integration of iPrint we are able to provide a solution for Mac OS X clients and 'Find Me' printing to MFD's.*

Richard, City College Brighton, UK

## PaperCut™

Used by over 50,000 organizations in 100+ countries, PaperCut is the only true cross-platform print control software available, providing full support for multiple operating systems and network environments.
