Novell SecureLogin 7.0 Service Pack 3 Hotfix 3 Readme

November, 2012

Novell®

Novell SecureLogin is a single sign-on application. It consists of multiple, integrated security systems that provide authentication and single sign-on to networks and applications. It provides a single entry point to the corporate network and its user resources, increasing security while enhancing compliance with corporate security policies. Novell SecureLogin also eliminates the requirement for users to remember multiple usernames, and passwords and automatically enters them for users when required. For detailed information on Novell SecureLogin, visit the Novell SecureLogin product Web site.

Novell SecureLogin 7.0 Service Pack 3 Hotfix 3 improves usability, and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure our products meet all your needs.

1 What's New?

Novell SecureLogin 7.0 Service Pack 3 Hotfix 3 includes the following enhancements and software fixes.

NOTE: For the list of new features, software fixes and enhancements in SecureLogin 7.0 Service Pack 3, see the Novell SecureLogin 7.0 Service Pack 3 Release Notes.

- Section 1.1, "Enhancements," on page 1
- Section 1.2, "Software Fixes," on page 2

1.1 Enhancements

1.1.1 Mozilla Firefox Support

SecureLogin 7.0 SP3 hotfix 3 supports Mozilla Firefox 15.0 and Mozilla Firefox 16.0.

1.2 Software Fixes

1.2.1 Wizard Flashes on Disabled Applications

The wizard does not flash on applications that are disabled. (BUG 764826)

1.2.2 SecureLogin 7.0.3 Crashes when Using the Wizard to Create Additional Matching Rule.

Crash due to process error leading to memory fault is fixed and you can now create a new rule for matching criteria using the wizard. (BUG 778399)

1.2.3 Java Accessibility Usage Causes Issue with Third Party Applications that Uses JTable Control with Custom Cell Renderer

Accessibility interactions are made more robust for SecureLogin threads so that third party exceptions does not prevent further SSO. Application specific changes to ignore specific class dialogs have been implemented. (BUG 768002)

1.2.4 Java Swing UI JDialog Predefined Buttons Inaccessible for Scripting

The predefined buttons of instances of JDialog which are not within the content pane is now identified by querying the parent of the content pane. (BUG 782557)

1.2.5 Disabling SSO for Applications does not Work in Offline Mode

You can now disable SSO for applications in both modes, offline and online. (BUG 580516)

1.2.6 TLaunch Exits without Attempting to Connect to all the Existing Emulator Sessions

Tlaunch now connects to multiple emulator sessions that are configured using HLLAPI. (BUG 785403)

1.2.7 In IExplore Support where IESSOBHO=0, SSO Intermittently Fails in that Tab

The process is enhanced, on connection failure, to retry up to three times with an interval of 10 milliseconds between each try. (BUG 787912)

1.2.8 GenerateOTP Command does not Accept only Mode Option due to an Issue with the Method Parameter

To support backward compatibility of GenerateOTP command, method parameter is not made mandatory. (BUG 773715)

2 System Requirements

For detailed information of supported environments, see "Supported Environments" in the Novell SecureLogin Quick Start Guide.

3 Installing SecureLogin 7.0 Service Pack 3

To install SecureLogin 7.0 Service Pack 3, see Novell SecureLogin Installation Guide.

4 Known Issues

For detailed information of all the known issues for SecureLogin 7.0 Service Pack 3, see "Known Issues" in the Novell SecureLogin 7.0 Service Pack 3 Release Notes.

5 Documentation

The complete documentation is available at, Novell SecureLogin 7.0 SP3 Documentation Web Site.
