

Novell Storage Manager 3.1.1.1

April 14, 2014

Novell®

1 Security Vulnerability

Novell Storage Manager 3.1.1 has been updated to use OpenSSL 1.0.1g instead of version 1.0.1.e in response to the Heartbleed vulnerability. Please see openssl.org site for more details on CVE-2014-0160. http://www.openssl.org/news/secadv_20140407.txt.

The Agent, Engine, and Event Monitor components were all affected by this vulnerability, and have been repackaged. Please install each of the updated components according to the documented methodologies found in the NSM Installation Guide. (<http://www.novell.com/documentation/storagemanager3/>).
