ZENworks Mobile Management

Using ZENworks Mobile Management on Windows Server 2008 x64

Follow these guidelines to set up and run ZENworks Mobile Management on Windows Server 2008 x64.

ASP.NET 2.0 32-bit version

For ZENworks Mobile Management to function correctly in a Windows 2008 x64 environment, IIS must run the 32-bit version of ASP.NET 2.0.

To run the 32-bit version of ASP.NET 2.0, follow these steps:

1 Click *Start* > *All Programs* > *Administrative Tools* > *Internet Information Services Manager*.

2 Navigate to the application pool for the website that has ZENworks Mobile Management installed.

3 Right-click on the application pool to select *Advanced Settings*.

4 Change *Enable 32-bit applications* to *True.*

5 Restart IIS or recycle the application pool
