

## Documentation Quick Index

This is a short index designed to provide quick access to hard-to-find information in the Novell ZENworks 10 Configuration Management documentation. An extensive index is not intended here, and the book titles that are visible on the Web contents page are not included.

**IMPORTANT:** If you find a word or phrase that you seek is not listed in the index, please use the User Comment feature to submit a request to add a new index item. Include the URL to the documentation page where your new index item should link to.

## Documentation Quick Index

### actions

administrator ([reporting rights](#); [rights descriptions](#); [rights management](#); [roles](#))

administrator-defined fields ([Asset Inventory](#); [Asset Management](#))

auditing, [remote management](#)

authentication ([remote management](#); [user](#))

### back up server

best practices ([bundles](#); [personality migration](#); [policies](#); [remote management](#))

bookmarking ZENworks Control Center locations

### bundles

BusinessObjects Enterprise Info View

centralized message logging

certificate authority ([back up](#); [restore](#))

closest server rules

content ([delivery](#); [replication](#); [repository](#))

Credential Vault

### database

deploying to devices ([manually](#); [prerequisites](#); [task-based](#))

deployment packages

device refresh schedule

discovery technologies ([IP](#); [LDAP](#))

disaster recovery

folders ([bundle](#); [policy](#); [reporting](#))

hot list device status

imaging bundle ([assigning](#); [defined](#))

imaging satellite server

importing devices

incrementing versions ([bundles](#); [policies](#))

Info View, BusinessObjects Enterprise

inventory collection data form

inventory only ([devices](#); [module](#))

linuxrc

local file rights, [assigning to languages](#)

### man pages

Management Zone (in *Administration Quick Start*: [configuration](#); in *System Administration Reference*)

migration ([applications](#); [associations](#); [imaging](#); [policies](#); [web client configuration](#); [workstations](#); [zone settings](#))

multicasting images

naming conventions

NMAP for ZENworks

novell-ziswin

novell-zisdservice

Patch Management, [license renewal](#)

personality collection, [user](#) ([applying](#); [storing](#))

personality template ([creating](#); [modifying](#))

PNP file

Portable Collector

Predefined Reports ([bundles](#); [policies](#); [licensing](#))

PRU (Product Recognition Update)

PXE ([defined](#); [enabling](#))

registration keys/rules

remote management ([auditing](#); [viewer](#); [listener](#); [proxy](#); [wake up](#))

remote management operations (diagnostics; file transfer;  
remote control; remote execute; remote view)  
renewing a Patch Management license  
reporting preferences  
reports (creating; exporting; folders; managing; predefined;  
rights)  
requirements (Asset Management upgrade; Personality  
Migration; Reporting Server; Satellite Servers; ZENworks  
10 Configuration Management; ZENworks upgrade)  
restore server  
retiring servers  
rights (descriptions; management; reporting)  
roles

## Satellite

satellite roles, ZENworks Adaptive Agent  
scheduling (bundles; discovery/deployment; reports)  
security (Endpoint (<http://www.novell.com/documentation/zesm35/userguide/index.html?page=/documentation/zesm35/userguide/data/bookinfo.html>); inventory; remote  
management [server]; remote management [client];  
Remote Management policy; USB/Wireless (<http://www.novell.com/documentation/zesm35/install/index.html?page=/documentation/zesm35/install/data/bookinfo.html>); Windows Group policy errors; zman)  
server (backing up; hierarchy; restoring; retiring)  
services, ZENworks (Linux; Windows)  
settings, modifying at different ZENworks Control Center  
levels  
SNMP (message format; policy)  
starting ZENworks services (Linux; Windows)  
stopping ZENworks services (Linux; Windows)  
system messages (log; viewing)  
System Updates  
template (device naming for registration; personality,  
creating; personality, modifying)  
third-party imaging  
tftp directory replication (Management Zone level, folder  
level, device level)

uninstalling (Reporting server; ZENworks Server)  
UPD payload format  
user-defined fields, see administrator-defined fields  
user personality collection (applying; storing)  
user sources

variables

watch lists

zac commands

ZENworks Adaptive Agent (configuring; deploying)

ZENworks Control Center

ZENworks Explorer

ZENworks services (Linux; Windows)

zenworks.s

zinfocollect utility

zisedit

zisview

zman commands

zmediacreator

zmgexp

zone (configuration; settings)
