

ZENworks Service Desk Customer Portal Reference

March 2022

The information in this guide pertains to the new customer (end-user) portal. This guide provides an overview of the tasks that a customer can perform in this new customer portal.

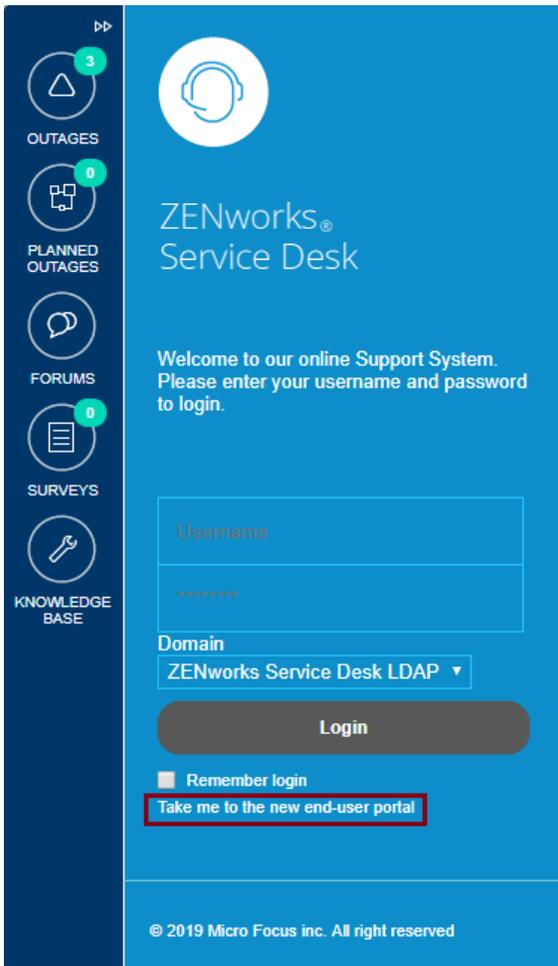

- ◆ “Overview” on page 1
- ◆ “Home” on page 2
- ◆ “Store” on page 7
- ◆ “Requests” on page 9
- ◆ “Services” on page 15
- ◆ “Items” on page 17
- ◆ “Self Help” on page 19
- ◆ “Outages” on page 22
- ◆ “My Profile” on page 25
- ◆ “Customizing the New Customer Portal” on page 25
- ◆ “Legal Notices” on page 26

Overview

The new customer portal enhances the overall user experience. Using this new customer portal, customer can view and request a Store Item, view all Requests, create requests from any page, view items and services and can create requests from the Item Details and Service Details page. Customers can also view Outages, Planned Outages and Self Help. Most of the features can be viewed and accessed from the Home page.

To access the new customer portal, you can perform any one of the following actions:

- ◆ In the ZENworks Service Desk login page, click the **Take me to the new end-user portal** link.

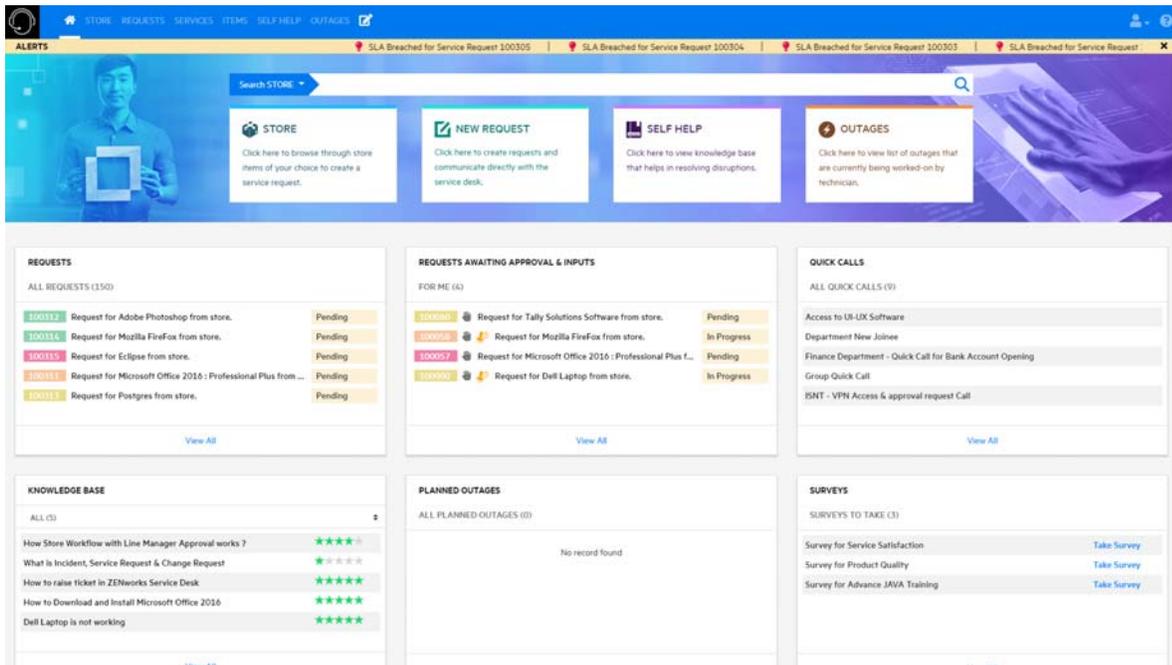

- ◆ Use the following URL:

https://<zenworks_service_desk_server>/servicedesk/

The new customer portal can be accessed through any devices such as desktops, mobiles, tablets.

Home

The home page displays most of the information that a customer can perform in ZENworks Service Desk.

The newly designed Home page includes the following features:

- ◆ Alerts are displayed on the top in the marquee style. Alerts can be differentiated with the icons that are associated with the severity (Information, Warning and Urgent) of the alert. In the Desktop view, hover on an alert displays the description of the alert as a tool tip.

To view additional information, click the alert. A pop-up is displayed with the alert information.

- ◆ Using the centralized search, you can search for any object in the Service Desk by selecting appropriate option.

- ◆ Easy navigation

Based on privileges, Store, New Request, Self Help and Outages cards are displayed below the search bar. Click on individual card to go that particular page.

Description on the card can be customized by administrators. For more information, see [Customizing the New Customer Portal](#).

- ◆ Dashboard that makes it easy for users to view the most important objects. Each dashlet displays the most recent objects, to view more, click View All. For more information, see [Dashboard](#).
- ◆ Create requests
For more information, see the [Creating a New Request](#) section.
- ◆ To rearrange the dashlets drag and drop the dashlets to the required position. After rearranging, click the save button. To reset or to get back the default dashlet view, click the reset button.

Following are the actions that an end-user can perform in the new end-user portal:

- ◆ View the list of Requests, quick calls, knowledge base articles, outages and survey.
- ◆ Go to Store, Self Help, Outages and new request page by clicking on respective tile.
- ◆ Create Requests.
- ◆ Search for objects.

Dashboard

The Home page of the new customer portal displays six dashlets. Following is the list of available dashlets.

- ◆ **Rearranging Dashlets:** To rearrange the dashlets drag and drop the dashlets to the required position. After rearranging, click the save button. To reset or to get back the default dashlet view, click the reset button.
- ◆ **Requests:** Lists the top requests for the user. To view a request, click the required request and to view all request, click View All. Number on top of the dashlet displays the total number of requests.

The color code associated with request ID represents the priority of the request:

- ◆  Urgent
- ◆  High
- ◆  Medium
- ◆  Low

To open a request in a new tab, right-click on the Request and click Open in New Tab.

For more information on request, see the [Requests](#) section.

REQUESTS		
ALL REQUESTS (150)		
100312	Request for Adobe Photoshop from store.	Pending
100314	Request for Mozilla FireFox from store.	Pending
100315	Request for Eclipse from store.	Pending
100311	Request for Microsoft Office 2016 : Professional Plus from ...	Pending
100313	Request for Postgres from store.	Pending
View All		

- ◆ **Requests Awaiting My Approval & Inputs:** Lists the most recent requests that are under awaiting inputs (need-info) and awaiting approval. Number on top of the dashlet displays the total number of requests that are under awaiting approval and inputs. Click View All to view all the requests that are awaiting approval and awaiting inputs. To open a request in a new tab, right-click on the Request and click Open in New Tab.

- ◆  This icon represents Awaiting Approval.
- ◆  This icon represents Awaiting Inputs (need-info).

NOTE: The *Team Manager* approval is not listed as requests awaiting my approval.

For more information, see [Requests](#).

- ◆ **Quick Calls:** Lists the most recent quick calls associated with the user. To view all the quick calls associated with the user, click View All. After clicking View All, CREATE NEW REQUEST page is displayed that includes a QUICK CALL TEMPLATE section. On click of individual quick call, a pop-up is displayed and a request can be created. For more information, see [Creating Request using the Quick Call or Group Quick Call](#).

- ◆ **Knowledge Base** The Knowledge Base dashlet lists the most recent knowledge base (articles, FAQs and Solutions). Click View All to view all knowledge base.

For more information, see [Self Help](#).

- ♦ **Planned Outages** The Planned Outages dashlet displays all the outages planned by the technician. To view all the outages, click View All.
For more information, see [Planned Outages](#).
- ♦ **Survey:** The Survey dashlet lists all the assigned surveys. To take a survey, click the required survey. By submitting the Survey, the count of the Survey will reduce and that particular survey will disappear from the list.

In Desktop view, the Survey page displays the list of surveys on the left panel side and the right panel displays the survey questions.

In case if any survey is for Serviced Customer, then to differentiate with other survey, Request Number along with the Survey is displayed in the Survey List.

Store

The Store page enables you to view and request store items.

- ◆ [“Requesting a Store Item” on page 7](#)
- ◆ [“Searching or Filtering Store Items:” on page 8](#)

Requesting a Store Item

To request a store item, click an available store item, specify the following information, and then click **Request**.

1. **Request Description:** Specify a description to define the request.
2. **Additional Details:**
 - a. **Line Manager:** This field is an auto-populated field. User cannot edit this field.
 - b. **Location:** Specify the location from where this request is created.

c. **Preferred Contact Type:** Select the preferred contact type. This field includes Phone and Email.

- ♦ **Email:** If you select **Email** as the **Preferred Contact Type**, then specify email address in the adjacent field.
- ♦ **Phone:** If you select **Phone** as the **Preferred Contact Type**, then specify contact details and **Preferred Contact Time** in the respective fields.

3. **Attachment:** If you want to provide any attachments with this request, you can either drag and drop the attachment or click the Attachment field, and then upload the required fields.

Any number of attachments can be added to a request, but each file should not exceed 100 MB in size.

NOTE: The Additional Details section can be enabled or disabled in **Setup > Privileges > Customers > Show Additional Information**.

Searching or Filtering Store Items:

To search or filter required Store Item, you can either use the filter or search option.

Searching Store Items

To search a store, perform the following steps:

1. On the upper-right corner the page, click the magnifying glass icon.
2. Click the drop-down, and then select Store.
3. Specify the search keyword, and then hit Enter.

If required, you can search other objects in the portal by selecting the required option, and then enter the search keyword.

Filtering Store Items

To filter Store items, in the left hand side of the store page perform the following actions to filter the Store Item:

1. Select the required store item, whether its **Requested**, **Not Requested** or **Both**.
2. In the **Categorization** section, select the categorization to which the store item belongs.
This field is populated based on Categorization available in **Store Setup > Store Categorization**.
3. In the Item Type section, select or search for the type of the store item.

This field is populated based on types available in **Configuration > Types**.

4. After specifying all the fields, click **Apply**.

NOTE: Filter can be applied on the searched store items.

Requests

The Requests page displays all the requests. In the request page, you can perform following actions:

- ◆ [“Creating a New Request” on page 9](#)
- ◆ [“Viewing Request Details” on page 11](#)
- ◆ [“Action on a Request” on page 12](#)
- ◆ [“Searching, Sorting and Filtering Requests” on page 12](#)

Creating a New Request

In the customer portal, you can create a request in multiple ways.

To create a request, you can perform any one of the following ways:

- ◆ In the menu bar, click the  icon
- ◆ In the Home page, click the tile

After performing any one of the above action, CREATE NEW REQUEST page is displayed.

Based on your privileges, you can create Incident, Service or Change request.

Description on each card can be customized. For more information, see Customization.

After clicking a tile, a pop-up window is displayed. Specify the required information, if required, you can add an attachment by clicking the attachment field, or drag and drop the file, and then click CREATE.

After clicking CREATE, a confirmation pop-up is displayed. If any proposed solutions are available, then in the confirmation pop-up Propose Solution Found is displayed. To view the proposed solutions, click View Proposed Solutions. For more information, see [Proposed Solutions](#).

To view the requests page, then click Go to Request Page.

Proposed Solutions

After clicking View PROPOSED SOLUTION, a list of solutions relevant to the request is displayed.

Open the required proposed solution. If any of the proposed solutions provides a resolution for your request, then click Resolve Request, else click Go To Request.

Creating Request using the Quick Call or Group Quick Call

The CREATE NEW REQUEST page also lists the quick call and group quick call templates created by technician.

To create a request from the quick call or group quick call temple, click the required quick call or group quick call. Specify the required information, and then click CREATE.

NAME	DESCRIPTION	CLASSIFICATION	ITEM
Request for address proof	Use this template to raise a request for address proof. Please provide the reason for this request and make sure that y...	Question	HR Service
New Employee: On-boarding template	Use this template to initiate new employee on-boarding tasks.	Question	HR Service, Admin Service

Viewing Request Details

To view details of any request, click the request that you want to view. Depending on the device type and resolution, following details are displayed:

- ◆ **Subject:** Displays the subject of the request that was specified while creating the request. This is an configurable field that can be enabled or disabled. To enable or disable Subject, login as a Admin, click [Setup > Privileges > Customer > Show Subject Field](#).
- ◆ **Request:** The request ID and request type icon. The request can be Incident, Service or Change.
- ◆ **Item Type:** The Item Type on which the request was created.
- ◆ **Item:** The item number for which the request was created.
- ◆ **Created On:** The time stamp when the request was created.
- ◆ **Status:** The current status of the request.
- ◆ **Technician:** The name of the technician to whom this request is assigned. This is an optional field that can be enabled or disabled. To enable Technician field, login as a Admin, click [Setup > Privileges > Customer > View Technician](#).

Expanding a Request:

Click the request to expand it. Following are the fields that are displayed after expanding a request:

- ◆ **Open Date:** The timestamp when the request was opened.
- ◆ **Closed Date:** The timestamp when the request was closed.
- ◆ **Priority:** The priority of the request. A request can have high, medium or low priority.
- ◆ **Classification:** Displays the to which class this request belongs.
- ◆ **Item Category:** Displays to which item category this request belongs.
- ◆ **Room:** Room assigned to the Customer.
- ◆ **Requested By:** Displays who created this request.
- ◆ **Description:** Description that was specified while creating the request. Click more to view the complete description.
- ◆ **Notes:** Notes added for this request. Multiple notes can be added for a request.

Action on a Request

Depending on the privileges and roles, any of the following actions can be performed:

- ◆ Add Note
- ◆ Approve
- ◆ Reject
- ◆ Escalate
- ◆ Deescalate
- ◆ Resolved
- ◆ Reopen

To reopen a request, the privileges must be set to **Allow Reopen** in **Customer Privileges**.

NOTE: To perform actions on a request, the privileges must be set to **Create and Edit** or **Edit**

To perform an action on a request:

1. Click , and select the required action.
2. (Optional) In the **CC** field, specify an email ID to whom you want to notify. This field auto suggests email IDs based on the specified characters.
3. Specify a reason in the **Note** field.

NOTE

1. While approving or resolving a request, Note is an optional field.
 2. All the notes on a request are stacked, and the latest note is displayed on top of the list.
 3. After collapsing the request, all the attachments in a request can be downloaded by clicking the attachment icon.
-

Searching, Sorting and Filtering Requests

There are a few actions that you can perform, which will help you find and pinpoint request in a list. These actions include search, sort and filter.

- ◆ [“Searching a Request” on page 12](#)
- ◆ [“Sorting Request” on page 13](#)
- ◆ [“Filtering Requests” on page 13](#)

Searching a Request

To search a request in the Request page, perform the following steps:

1. On the upper-right corner the page, click the magnifying glass icon.
2. Click the drop-down, and then select Request.

3. Specify the search keyword, and then hit Enter.
4. If required, you can search other objects in the portal by selecting the required option, and then enter the search keyword.

Sorting Request

To sort items in the Request page, click or tap the element name to sort the list either in ascending or descending order.

You can sort the Items based on the following elements:

- ◆ Request
- ◆ Item
- ◆ Created
- ◆ Updated
- ◆ Status

Filtering Requests

The left-hand side of the Items page displays the filter panel. Using this filter panel, you can filter items based on **Category**, **Item Type**, and **Status**.

Along with these options, you can filter Requests based on **Open Requests Only**, **Awaiting my Approval**, and **Awaiting my input**.

NOTE: The *Team Manager* approval is not listed as requests awaiting my approval.

In any of the list in the new customer portal, tap or click the element name to sort the list either in ascending or descending order.

You can sort the Items based on the following elements:

- ◆ Title
- ◆ Classification
- ◆ Created
- ◆ Views
- ◆ Rating

Filtering the Knowledge Base

To filter the knowledge base, you can either use the filter available on the left-hand side or the filter option available on the right-hand side of the Knowledge Base page. Same operations can be performed in the Articles, FAQs and Solutions pages.

Filtering knowledge base using the Filter panel : The left-hand side of the Knowledge Base page displays the filter panel. Using this filter panel, you can filter knowledge base based on **Category** and **Item Type**.

Figure 1 Filters

Customized Filter : On the right-hand side of the outages page, another filter is displayed. Click , select the required option.

The available filter options are:

- ◆ **All:** Displays all the knowledge base.
- ◆ **Last 7 Days:** Displays the knowledge base that were added in the last 7 days.
- ◆ **Last 30 Days:** Displays the knowledge base that were added in the last 30 days.
- ◆ **Custom:** Based on the requirement, you can search for knowledge base that were added between two specific dates.

The Custom drop-down filters for knowledge base between two specific dates. To filter knowledge base between two specific dates, select Custom from the drop-down select the required dates, and then click Apply.

Figure 2 Custom Filter

Outages

The Outages tab displays both current outages and planned outages. A number is associated with each tab, which indicates the number of Outages or Planned Outages.

The Outages tab is displayed only when Outages Page privilege is enabled in the User portal.

- ◆ [“Outages” on page 22](#)
- ◆ [“Planned Outages” on page 22](#)
- ◆ [“Searching, Sorting and Filtering” on page 23](#)

To enable or disable the Outages tab, perform the following:

1. Log into the User portal using administrator or supervisor credentials.
2. Click Setup.
3. In the Setup page, click the Setup tab, click Privileges, and then click System.
4. In Outages Option, depending on the requirement, select either Yes or No, and then click Save.

Outages

An outage is a period when some service is not available or when equipment is closed down due to expected or unexpected events. For example, an Item is out-for-repair or is faulty. Outages includes two tabs Outages and Planned Outages.

This page lists all the current outages that are associated with the user.

Viewing the Outages Details

To view information of an outage, click any outage.

Following are some of the information displayed in the outages page:

- ◆ Category
- ◆ Status
- ◆ Item Type
- ◆ Service Level
- ◆ Device Type

On the right-hand side of this page, requests that are related to the outage is displayed. This field is displayed only in the Desktop view.

Planned Outages

Planned Outages are used to manage Items' proposed unavailability. This is useful for informing Customers and Users about planned changes to infrastructure that may cause an Item to be taken offline or out of service.

To enable or disable the Planned Outages tab, perform the following:

1. Log into the User portal using administrator or supervisor credentials.
2. Click Setup.

3. In the Setup page, click the Setup tab, click Privileges, and then click System.
4. In Planned Outages Option, depending on the requirement, select either Yes or No, and then click Save.

Viewing the Planned Outages Details

To view information of a planned outage, click any outage.

Following are some of the information displayed in the planned outages page:

- ◆ Category
- ◆ Status
- ◆ Item Type
- ◆ Service Level
- ◆ Device Type

On the right-hand side of this page, requests that are related to the outage is displayed.

Searching, Sorting and Filtering

There are a few actions that you can perform, which will help you find and pinpoint services in a list. These actions include search, sort and filter.

- ◆ [“Searching the Outages” on page 23](#)
- ◆ [“Sorting Outages” on page 23](#)
- ◆ [“Filtering the Outages” on page 24](#)

Searching the Outages

To search an outage, perform the following steps:

1. On the upper-right corner the page, click the magnifying glass icon.
2. Click the drop-down, and then select **Outage**.
3. Specify the search keyword, and then hit Enter.

If required, you can search other objects in the portal by selecting the required option, and then enter the search keyword.

Sorting Outages

In any of the list in the new customer portal, tap or click the element name to sort the list either in ascending or descending order.

You can sort the Outages based on the following elements:

- ◆ Item Name
- ◆ Category
- ◆ Item Type
- ◆ Status
- ◆ Inactive Time

You can sort the Planned Outages based on the following elements:

- ◆ Start Date
- ◆ End Date

Filtering the Outages

To filter the Outages, you can either use the filter available on the left-hand side or the filter option available on the right-hand side of the Outages page.

Filtering knowledge base using the Filter panel : The left-hand side of the Outages and Planned pages displays the filter panel. Using this filter panel, you can filter Outages based on **Category** and **Item Type**.

Customized Filter : On the right-hand side of the Planned Outages page, another filter is displayed. Click

 **ALL** , select the required option.

The available filter options are:

- ◆ **All:** Displays all the knowledge base.
- ◆ **Custom:** Based on the requirement, you can search for outages that were added between two specific dates.

The Custom drop-down filters for outages between two specific dates. To filter outages between two specific dates, select Custom from the drop-down select the required dates, and then click Apply.

My Profile

As a customer, you can view your account information in the My Profile page.

1. In the top upper-right corner of the new customer Portal, click the icon, and then click **My Profile**.
2. In this page, you can view details such as **Username** and **Email**.

NOTE: If the system is synchronized with an authentication server, user cannot modify any information in the My Profile page.

Customizing the New Customer Portal

Depending on the requirements, the strings and logo displayed in the new customer portal can be customized.

The Customize tab in the admin portal enables you to modify the new customer portal, where system banners can be replaced with the appropriate organizational banners. Graphics included should be PNG images. The Application Banner should be of appropriate pixels.

Banner

To add a custom banner, log into the admin portal as an administrator and perform the following steps:

1. Click Setup > Customize > Customer Portal

Banner Type	Description
Login Page Logo	Replace the default ZENworks Service Desk logo on the login page. The login page logo should be of 240 x 90 pixels.
Application Header	Replace the header logo in the new customer portal. The Application Header should be of 56 x 56 pixels.
Portal Banner	Replace the banner in the new customer portal. The portal banner should be of 1900 x 350 pixels.

2. To use Custom Banners, select the Use Custom check box.
3. To upload a new Login Page Logo, Application or Portal banner, click New.
4. Click Browse and select the required image, and then click the upload button.
The image will be uploaded.
5. Click Save.

Portal

The text displayed in the customer portal can be customized by administrator. Redirection cards (Store, Create Request, Self Help and Outages) displayed in the Home Page and on the New request Page (Create Incident, Create Service Request and Create Change Request) can be customized.

- ◆ **HomePageStoreLegend:** Displayed when the customer is in home page Store.
- ◆ **HomePageCreateRequestLegend:** Displayed when the customer is in home page Create Request.

- ◆ **HomePageSelfHelpLegend:** Displayed when the customer is in home Self Help.
- ◆ **HomePageOutagesLegend:** Customize the text displayed for the Outages widget in the home page.
- ◆ **IncidentLegend:** Displayed when the customer selects Report an Incident
- ◆ **ServiceRequestLegend:** Displayed when the customer selects Report a Service Request
- ◆ **ChangeRequestLegend:** Displayed when the customer selects Report a Change Request

To customize perform the following steps

1. Click Setup > Customize > Customer Portal
2. Click the Portals tab.
3. Click the required name. The HTML editor page is displayed.
4. Edit or replace the message and then click Save. To restore the default message, click Restore Default

CSS

The customer portal can be further customized by administrators using the cascading style sheets (CSS). The login page and Header (Navigation bar, Menu items and user profile) of the new customer portal can be customized using the CSS.
