## Support for Windows Vista

Novell ZENworks Personality Migration now supports Windows Vista as the destination and source operating system. In other words, you can migrate the settings on Windows Vista. Existing system scripts are updated for supporting Windows Vista.

**Note:** For more information on the updated scripts, see the *Inside Scripting guide*.

## DNA File Verification

The file verification feature verifies the DNA files created by the deferred migration process against a possible data corruption. You can choose to perform a quickest or surest verification.

From this release, Novell ZENworks Personality Migration adds checksums to the DNA files that are important for quick verification. So, the DNA files created from the previous releases can be verified using the surest verification process only.

**Note:** For more information on file verification, see the *Reference Guide*, *Novell ZENworks Personality Migration help*, *DNA Options Editor Help*, and the *DNA Explorer help*.

## Support for Microsoft Office 12

With this release, Novell ZENworks Personality Migration supports migration of settings from previous Microsoft Office versions to Microsoft Office 12 and migration of settings between Microsoft Office 12 versions.

**Note:** For more information on the new scripts for Microsoft Office 12 migrations, see the *Inside Scripting guide*.

## Support for Internet Explorer 7

With this release, Novell ZENworks Personality Migration supports migration of settings from previous versions of Internet Explorer to Internet Explorer 7 and migration of settings between Internet Explorer 7 versions.

**Note:** For more information on the new scripts for Internet Explorer 7 migrations, see the *Inside Scripting guide*.

## Validation

Validation is removed from this release.

## Muscle Migration

Muscle migration is removed from this release.
