5 Known Issues in GroupWise 2014 R2 SP3

5.1 Java update breaks WebAccess

Installing `java-1_7_1-ibm-devel|1.7.1_sr4.20-26.13.1` on your GroupWise WebAccess server breaks WebAccess on that server. To fix this issue, upgrade Java to `java-1_7_1-ibm-devel|1.7.1_sr4.20-26.17.1`.

5.2 Java install error during GroupWise install on Windows Server 1709

During the installation of GW 14.2.3 components WebAccess, CalHost, and Monitor, you can receive the following error message: "The installation of Java 2 Standard Edition Runtime Environment 8 (x64) appears to have failed. Do you want to continue the installation?". Even though this error appears, Java installs on the server and GroupWise components work correctly. Java should correct this error message in the future.
