August 6, 2008

QUICK START

Documentation Quick Index

This is a short index designed to provide quick access to hard-to-find information in the Novell ZENworks 10 Configuration Management documentation. An extensive index is not intended here, and the book titles that are visible on the Web contents page are not included.

IMPORTANT: If you find a word or phrase that you are looking for is not listed in the index, please use the User Comment feature to submit a request to add the index item. Include the URL to the documentation page that the index item should link to.

actions

administrator ([reporting rights](#); [rights descriptions](#); [rights management](#); [roles](#))

administrator-defined fields ([Asset Inventory](#); [Asset Management](#))

[auditing, remote management](#)

authentication ([remote management](#); [user](#))

[back up server](#)

best practices ([bundles](#); [personality migration](#); [policies](#); [remote management](#))

[bundles](#)

[BusinessObjects Enterprise Info View](#)

[centralized message logging](#)

certificate authority ([back up](#); [restore](#))

[closest server rules](#)

content ([delivery](#); [replication](#); [repository](#))

[Credential Vault](#)

deploying to devices ([manually](#); [prerequisites](#); [task-based](#))

[deployment packages](#)

[device refresh schedule](#)

discovery technologies ([IP](#); [LDAP](#))

folders ([bundle](#); [policy](#); [reporting](#))

Novell®

hot list device status

imaging bundle (assigning; defined)

imaging satellite server

importing devices

incrementing versions (bundles; policies)

Info View, BusinessObjects Enterprise

inventory collection data form

inventory only (devices; module)

linuxrc

local file rights, assigning to languages

man pages

Management Zone (in *Administration Quick Start*: configuration; settings; in *System Administration Reference*)

migration (applications; associations; imaging; policies; web client configuration; workstations; zone settings)

multicasting images

naming conventions

NMAP for ZENworks

novell-ziswin

novell-zisdservice

personality collection, user (applying; storing)

personality template (creating; modifying)

PNP file

Portable Collector

PRU (Product Recognition Update)

PXE (defined; enabling)

registration keys/rules

remote management (auditing; viewer)

remote management operations (diagnostics; file transfer; remote control; remote execute; remote view)

reporting preferences

reports (creating; exporting; folders; managing; predefined; rights)

requirements (Asset Management upgrade; Personality Migration; Reporting Server; ZENworks 10 Configuration Management; ZENworks upgrade)

restore server

retiring servers

rights (descriptions; management; reporting)

roles

Satellite Server

satellite roles, ZENworks Adaptive Agent

scheduling (bundles; discovery/deployment; reports)

security (Endpoint (<http://www.novell.com/documentation/zesm35/userguide/index.html?page=/documentation/zesm35/userguide/data/bookinfo.html>); inventory; remote management [server]; remote management [client]; Remote Management policy; USB/Wireless (<http://www.novell.com/documentation/zesm35/admin/index.html?page=/documentation/zesm35/admin/data/bookinfo.html>); Windows Group policy errors; zman)

server (backing up; hierarchy; restoring; retiring)

services, ZENworks (Linux; Windows)

settings, modifying at different ZENworks Control Center levels

SNMP (message format; policy)

starting ZENworks services (Linux; Windows)

stopping ZENworks services (Linux; Windows)

system messages (log; viewing)

System Updates

template (device naming for registration; personality, creating; personality, modifying)

third-party imaging

uninstalling (Reporting server; ZENworks Server)

UPD payload format

user-defined fields, see administrator-defined fields

user personality collection (applying; storing)

user sources

variables

watch lists

zac commands

ZENworks Adaptive Agent (configuring; deploying)

ZENworks Control Center

ZENworks Explorer

ZENworks services

zenworks.s

zinfocollect utility

zisedit

zisview

zman commands

zmediacreator

zmgexp

zone (in *Administration Quick Start*: **configuration**; **settings**; in *System Administration Reference*)
