	WebDAV Support	9
	Connecting to NetStorage Using WebDAV in NetDrive	9
	Using the NetDrive Client behind a Firewall Regulated by BorderManager	9

About This Guide

This guide provides information on known issues for Novell® NetDrive 4.1 and consists of the following section:

- ♦ Chapter 1, “Novell NetDrive 4.1,” on page 9

Additional Documentation

For emerging issues with Novell NetDrive, see the Novell Support Knowledgebase Web site (<http://search.novell.com/NSearch/SearchServlet?template=ResultListTerseTemplate.html&numhits=20&theme=support&query=netdrive&collection=Support>).

Documentation Updates

For the most recent version of the *Novell NetDrive 4.1 Readme*, see the Novell iFolder 2.1 documentation Web site (<http://www.novell.com/documentation/ig/ifolder21/index.html>).

Documentation Conventions

In this documentation, a greater-than symbol (>) is used to separate actions within a step and items within a cross-reference path.

A trademark symbol (®, ™, etc.) denotes a Novell trademark. An asterisk (*) denotes a third-party trademark.

When a single pathname can be written with a backslash for some platforms, or a forward slash for other platforms, the pathname is presented with a backslash. Users of platforms that require a forward slash, such as UNIX*, should use forward slashes as required by the software.

1

Novell NetDrive 4.1

This section discusses the following known issues for Novell® NetDrive 4.1:

- ♦ “WebDAV Support” on page 9
- ♦ “Connecting to NetStorage Using WebDAV in NetDrive” on page 9
- ♦ “Using the NetDrive Client behind a Firewall Regulated by BorderManager” on page 9

WebDAV Support

Novell® NetDrive 4.1 supports secure HTTP (HTTPS) for WebDAV *only* on Windows* NT 4/2000 and Windows XP workstations.

Connecting to NetStorage Using WebDAV in NetDrive

If you try to connect to the frame-based Web interface of Novell NetStorage using WebDAV in NetDrive, you receive a 301 Moved Permanently error. The frame-based Web interface’s URL is

`https://<ipaddr>:<portnumber>/NetStorage`

To avoid this error, connect to the text-based Web interface to NetStorage. The correct URL for connecting to NetStorage using WebDAV in NetDrive is

`https://<ipaddr>:<portnumber>/oneNet/NetStorage`

IMPORTANT: Both URLs are case sensitive.

Using the NetDrive Client behind a Firewall Regulated by BorderManager

If your Novell NetDrive client is behind a firewall regulated by a BorderManager® server that is configured for FTP proxy and authentication, NetDrive cannot map a network drive via FTP to any servers that reside outside the firewall. To solve this problem, disable the FTP proxy authentication on the BorderManager server.
