

VPAT™

Voluntary Product Accessibility Template®

Version 1.3

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

Date: July 17, 2009

Name of Product: Novell Teaming 2.0

Section 1194.21 Software Applications and Operating Systems – Detail

VPAT™

Voluntary Product Accessibility Template®

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard,	Not Applicable	This requirement is not applicable.

<p>product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.</p>		<p>Novell Teaming 2.0 is not a software application or operating system and does not have product functions or results that can be discerned textually in this capacity.</p>
<p>(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 is not a software application or operating system and does not disrupt or disable accessibility features in this capacity.</p>
<p>(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 is not a software application or operating system and does not have interactive user interface elements in this capacity.</p>
<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming</p>

<p>Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>		<p>2.0 is not a software application or operating system and does not fall under this requirement in this capacity.</p>
<p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 is not a software application or operating system and does not use images in its user interface in this capacity.</p>
<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 is not a software application or operating system and no textual information is conveyed within application. The entire user interface is visual information in this capacity.</p>
<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable</p> <p>Novell Teaming 2.0 is not a software application or operating system and does not</p>

		<p>override user selected contrast, color sections and display attributes in this capacity.</p>
<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable</p> <p>Novell Teaming 2.0 is not a software application or operating and does not use animation in its user interface in this capacity.</p>
<p>(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 is not a software application or operating system and does not use color coding to identify information, indicate an action, prompt a response, or distinguish a visual element in this capacity.</p>
<p>(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 is not a software application or operating system and does not</p>

		allow the user to select color schemes other than the default setting in this capacity.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Not Applicable	This requirement is not applicable. Novell Teaming 2.0 is not a software application or operating system and does not contain flashing or blinking text, objects, or other elements in this capacity.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not Applicable	This requirement is not applicable. Novell Teaming 2.0 is not a software application or operating system and does not contain electronic forms in this capacity.

***Section 1194.22 Web-based Internet
information and applications – Detail***

VPAT™

Voluntary Product Accessibility Template®

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supported with Minor Exception	<p>This requirement is met with only a few minor exceptions.</p> <p>A text equivalent is provided for many non-text elements but not all. This issue does not block major functionality although this exception may affect users with vision difficulties or impairments, including those using assistive technology.</p> <p>The following scenario is not supported:</p> <ul style="list-style-type: none"> • Determining the status of a task in the Task List. A work around is available by viewing the task in My Workspace.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Supported with Exception	<p>This requirement is only partially met.</p> <p>The following major scenario is not supported:</p> <ul style="list-style-type: none"> • Training Videos are not closed captioned. This does not block the use of the product.
(c) Web pages shall be designed so that all information conveyed	Supported	This requirement is fully

<p>with color is also available without color, for example from context or markup.</p>		<p>met.</p> <p>All information conveyed through color in Novell Teaming 2.0 is available in an alternate format.</p>
<p>(d) Documents shall be organized so they are readable without requiring an associated style sheet.</p>	<p>Supported with Exception</p>	<p>This requirement is only partially met.</p> <p>The following major scenarios are not supported:</p> <ul style="list-style-type: none"> • The Calendar page of the product is not accessible. This prevents an AT user from making use of the Calendar feature of the product. <p>This exception will likely affect users with vision difficulties or impairments, including those using assistive technology.</p>
<p>(e) Redundant text links shall be provided for each active region of a server-side image map.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>There are no server-side image maps used within Novell Teaming 2.0.</p>
<p>(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>There are no client-side image maps used within Novell Teaming 2.0.</p>

<p>(g) Row and column headers shall be identified for data tables.</p>	<p>Supported</p>	<p>This requirement is fully met.</p> <p>Row and column headers are identified for all data tables.</p>
<p>(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.</p>	<p>Supported</p>	<p>This requirement is fully met.</p> <p>Data cells contain markup to associate them with all relevant row and column headers.</p>
<p>(i) Frames shall be titled with text that facilitates frame identification and navigation</p>	<p>Supported</p>	<p>This requirement is fully met.</p> <p>All frames are titled with unique text to facilitate frame identification and navigation.</p>
<p>(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>There is no refreshable content within Novell Teaming 2.0.</p>
<p>(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>A text only page was not necessary to provide an accessible experience.</p>
<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>Supported with Minor Exception</p>	<p>This requirement is met with only a few minor exceptions.</p> <p>All information provided through scripts is identified with</p>

		<p>functional text that can be read by assistive technology except:</p> <ul style="list-style-type: none"> • If scripting is disabled many functions and events do not work. The user is given a message indicating that scripting is required and must be enabled to use the product. <p>This exception may affect users with vision difficulties or impairments, including those using assistive technology.</p>
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>No applets, plug-ins or other applications are required to interpret Novell Teaming 2.0 content.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supported with Exception</p>	<p>This requirement is only partially met.</p> <p>The following major scenarios are not supported:</p> <ul style="list-style-type: none"> • The Calendar page of the product is not accessible. This prevents an AT user from

		<p>making use of the Calendar feature of the product.</p> <p>This exception will likely affect users with vision difficulties or impairments, including those using assistive technology.</p>
(o) A method shall be provided that permits users to skip repetitive navigation links.	Supported	<p>This requirement is fully met.</p> <p>A method is provided that permits users to skip repetitive navigation links.</p>
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Supported	<p>This requirement is fully met.</p> <p>When a timed response is required, the user is alerted and given sufficient time to indicate more time is required.</p>

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

Section 1194.23 Telecommunications Products

– Detail

VPAT™

Voluntary Product Accessibility Template[®]

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use.	Not Applicable	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does not provide voice communication in this capacity.</p>
(b) Telecommunications products which include voice communication functionality shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols.	Not Applicable	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does not provide voice communication functionality in this capacity.</p>
(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs.	Not Applicable	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does not provide voice mail, auto-attendant, and interactive voice response telecommunications system functionality or support in this capacity.</p>
(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the	Not Applicable	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does not feature or include support for voice mail, messaging, auto-</p>

<p>user to indicate more time is required.</p>		<p>attendant, or interactive voice response telecommunications systems that require a response from a user within a time interval in this capacity.</p>
<p>(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does use displays to convey additional information in this capacity.</p>
<p>(f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does not include support for transmitted voice signals in this capacity.</p>
<p>(g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does not allow a user to adjust the receive volume in this capacity.</p>
<p>(h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does not deliver output by an audio transducer which is normally held up to the ear in this capacity.</p>

<p>(i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 is not a telecommunication product and does not interfere with hearing technologies in this capacity.</p>
<p>(j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 is not a telecommunication product and does not transmit or conduct information or communication in this capacity.</p>
<p>(k)(1) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does have any mechanically operated control or keys in this capacity.</p>
<p>(k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.</p>	<p>Not Applicable</p>	<p>This requirement is not applicable.</p> <p>Novell Teaming 2.0 does have any mechanically operated control or keys in this capacity.</p>
<p>(k)(3) Products which have mechanically operated controls or</p>	<p>Not Applicable</p>	<p>This requirement is</p>

keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.		not applicable. Novell Teaming 2.0 does have any mechanically operated control or keys in this capacity.
(k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.	Not Applicable	This requirement is not applicable. Novell Teaming 2.0 does have any mechanically operated control or keys in this capacity.
