**Novell®**

Networking a small business doesn't have to be a hassle, and it doesn't have to be expensive. With Novell® Small Business Suite, you not only get easy deployment and management, you acquire an arsenal of applications and tools that make any small business more efficient, productive and profitable.

Here's why Novell Small Business Suite makes sense for you...

**One Stop Shop** - Novell Small Business Suite includes everything needed to connect a small business to employees, customers and suppliers. Use standard, off-the-shelf hardware to quickly deploy and easily configure connectivity for your small business. All networking services are included for file sharing, printing, authentication, collaboration and more. Everything you need is provided from a single vendor in one package at a simple per user price.

**A Trusted Source** - Novell has been the world's leading provider of network services for over twenty years. Novell solutions are renowned in the industry for their stability, superior performance, impressive ROI and scalability and have garnered numerous prestigious industry awards. Novell Small Business Suite allows you to configure and trust—focus on your business and be assured your network is dependable and safe.

**Low Cost** - Novell Small Business Suite not only helps you cut costs but makes your small business more productive. When compared to any other option, networking services with Novell Small Business Suite are cheaper to acquire, less costly to deploy and manage, and provide a rapid return on investment while seamlessly providing users the environment and applications they need to work effectively.

**Easy Administration** - Most small businesses don't have the luxury of onsite support staff. With Novell Small Business Suite, you don't need them. Web-based administration tools make it easy for service providers or corporate IT staff to remotely manage every facet of your small business network from user provisioning to application deployment to maintenance and backup.

**Novell Partners** - Novell's extensive collection of partners gives you access to premium services—anywhere in the world. Whether you need deployment, integration, applications, training, consulting, development or a local reseller, a qualified and responsive Novell partner is available to service your small business. Thousands of channel partners are selling Novell products, solutions and services while OEM giants like Dell and HP provide prepackaged hardware solutions.

**Application Support** - Hundreds of line-of-business applications are supported on the Novell Small Business Suite platform including accounting, ERP, legal, dental, medical, database, document management, construction, mail, restaurant, insurance, anti-virus and many more. Almost any application you need for small business is supported making it possible to simplify and consolidate servers and IT services.

**Nothing Like It** - Novell Small Business Suite is the only packaged offering available that includes a full range of tried and tested, industry accepted file, print, collaboration, security and management services. For a detailed comparison, see the white paper at: <http://www.novell.com/collateral/4621394/4621394.pdf>

In short, Novell Small Business Suite provides any small or medium business a maximum network with minimum effort. Products provided in Novell Small Business Suite 6.6 include the following applications and features:

1. **Novell NetWare®**, including two-node clustering and anytime/anywhere file and print access
2. **Novell GroupWise® 6.5**, a collaboration tool which includes e-mail, junk mail handling, calendaring and instant messaging
3. **Novell BorderManager® 3.8**, which provides network security, proxy cache, firewall and virtual private network (VPN)
4. **Novell ZENworks® for Desktops 6.5** management services, including application management, hardware inventory, workstation imaging and remote control, and self healing capabilities
5. **Novell DirXML Starter Pack** coordinates the synchronization of data between dissimilar systems such as Microsoft Active Directory or NT domains for centralized identity management
6. **Support for up to 100 users**

An affordable, full-service bundle of high-performance, easy-to-use software tools, Novell Small Business Suite 6.5 instantly and effortlessly transforms the small business into a fully networked powerhouse primed for success. It's big business networking for small businesses at an affordable price.
