

SUSE® Linux Enterprise 10 for Healthcare Computing

SUSE® Linux Enterprise 10 is the serious choice for the healthcare industry—from the desktop to the data center. With SUSE Linux Enterprise 10, you can provide your physicians and staff with faster access to life-saving resources, safeguard your most sensitive clinical information and take a significant bite out of IT costs.

A More Reliable, Secure and Low-cost Platform

With tight IT budgets, diverse infrastructures, strict security requirements and mounting regulatory requirements, your healthcare organization needs a rock-solid, enterprise-grade platform, one that plugs easily into your existing IT infrastructure and is secure and simple to use and manage.

Our answer? SUSE Linux Enterprise 10 from Novell®, the Platform for the Open Enterprise™. It's the best-engineered, lowest-cost and most interoperable platform for meeting the strict requirements of the healthcare industry. SUSE Linux Enterprise is a complete Linux* solution that will help you meet the needs of physicians, patients, staff members and administrators alike. It includes the following components:

SUSE Linux Enterprise Server 10

Why choose SUSE Linux Enterprise Server for your healthcare organization? The answer is simple: it's reliable, low-cost and extremely

secure. With SUSE Linux Enterprise Server, you can be sure you are getting the best enterprise-quality solution for your clinical and administrative applications. Developed and backed by Novell, SUSE Linux Enterprise Server is:

- **Reliable**—*With proven results in some of the world's largest mission-critical server deployments, advanced clustering capabilities, sophisticated high-availability storage services and more*
- **Low-cost**—*With a subscription model that costs a fraction of proprietary platforms with similar capabilities*
- **Secure**—*With built-in encryption and a firewall, security certificate creation and management, user authentication and access control, proxy management and application security*
- **Best-engineered**—*With unique virtualization capabilities that make it easy to consolidate workloads on a single server or share a single workload across multiple servers*

■ Solutions:

SUSE Linux Enterprise 10

■ Products:

- SUSE Linux Enterprise Server
- SUSE Linux Enterprise Desktop
- Novell Customer Center

“The flexibility we have with SUSE Linux Enterprise has exceeded our expectations. There is no way we could keep up with rapid change if we continued to manage proprietary platforms. We now have a cost-effective way to remain compliant and maintain high availability.”

Eric Leader

Chief Technology Architect
Catholic Healthcare West

“We chose Novell because its open source and Linux products have a great reputation. I don’t know of any other company offering a full product suite with the openness that Novell provides.”

Danny Wall

www.novell.com

- **Scalable**—With certification for many different hardware architectures, including (but not limited to) x86, AMD64, IA-64, PPC and IBM* System Z* machines, and the ability to scale to up to 1,024 processors

SUSE Linux Enterprise Desktop 10

SUSE Linux Enterprise Desktop offers you choice and flexibility—from high-end PCs to basic single-use terminals. With SUSE Linux Enterprise Desktop from Novell, you get a desktop solution that is:

- **Easy to use**—With simple menu designs, an integrated search engine, a three-dimensional graphics engine and a complete arsenal of business productivity tools
- **Interoperable**—With seamless integration with Windows*, Macintosh*, UNIX* and other desktop and server operating systems and applications
- **Secure**—With application-level security from Novell AppArmor™ that prevents unauthorized access to sensitive clinical applications
- **Low cost**—With an inexpensive subscription model that costs about one-fifth of what you’re paying now and

includes all the productivity applications you need

- **Flexible**—With fast, easy deployments on high-end PCs, laptops and thin-client, multiuser clinical workstations

Novell Customer Center

In the fast-paced world of healthcare, you don’t have time to hunt for answers. The new Novell Customer Center makes it easy to obtain the information you need and manage all your interactions with Novell from one location. You can quickly review the status of your Novell products, subscriptions and services, and also obtain critical Linux updates and support. Novell Customer Center features automated registration, renewal notification and complete order history. And, it combines tools and services that simplify updating, patching and licensing compliance—all of which help you reduce your overall system management costs.

Give It a Try

We invite you to try SUSE Linux Enterprise 10 in your healthcare organization. We’re confident it can help you create and manage effective, low-cost IT solutions for the demanding healthcare industry.
