

Novell ZENworks 10 Configuration Management SP3

March 30, 2010

Novell®

Documentation Quick Index

This is a short index designed to provide quick access to hard-to-find information in the Novell ZENworks 10 Configuration Management documentation. An extensive index is not intended here, and the book titles that are visible on the Web contents page are not included.

IMPORTANT: If you find a word or phrase that you seek is not listed in the index, please use the User Comment feature to submit a request to add a new index item. Include the URL to the documentation page where your new index item should link to.

Documentation Quick Index

actions

administrator ([reporting rights](#); [rights descriptions](#); [rights management](#); [roles](#))

administrator-defined fields ([Asset Inventory](#); [Asset Management](#))

[auditing, remote management](#)

authentication ([remote management](#); [user](#))

authentication mechanism ([kerberos](#); [shared secret](#); [username/password](#))

[back up server](#)

best practices ([bundles](#); [personality migration](#); [policies](#); [remote management](#))

[bookmarking ZENworks Control Center locations](#)

[bundles](#)

[BusinessObjects Enterprise Info View](#)

[centralized message logging](#)

certificate authority ([back up](#); [restore](#))

[closest server rules](#)

coexistence ([coexistence with other ZENworks products](#), [imaging operations](#))

content ([delivery](#); [replication](#); [repository](#))

[Credential Vault](#)

personality collection, user ([applying](#); [storing](#))

personality template ([creating](#); [modifying](#))

[PNP file](#)

[Portable Collector](#)

Predefined Reports ([bundles](#); [policies](#); [licensing](#))

[PRU \(Product Recognition Update\)](#)

PXE ([defined](#); [enabling](#))

- registration keys/rules
- remote management (auditing; viewer; listener; proxy; wake up)
- remote management operations (diagnostics; file transfer; remote control; remote execute; remote view)
- renewing a Patch Management license
- reporting preferences
- reports (creating; exporting; folders; managing; predefined; rights)
- requirements (Asset Management upgrade; Personality Migration; Reporting Server; Satellite Servers; ZENworks 10 Configuration Management; ZENworks upgrade)
- restore server
- retiring servers
- rights (descriptions; management; reporting)
- roles
- Satellite
- satellite roles, ZENworks Adaptive Agent
- scheduling (bundles; discovery/deployment; reports)
- security (Endpoint (<http://www.novell.com/documentation/zesm35/userguide/index.html?page=/documentation/zesm35/userguide/data/bookinfo.html>); inventory; remote management [server]; remote management [client]; Remote Management policy; USB/Wireless (<http://www.novell.com/documentation/zesm35/install/index.html?page=/documentation/zesm35/install/data/bookinfo.html>); Windows Group policy errors; zman)
- server (backing up; hierarchy; restoring; retiring)
- services, ZENworks (Linux; Windows)
- settings, modifying at different ZENworks Control Center levels
- SNMP (message format; policy)
- starting ZENworks services (Linux; Windows)
- stopping ZENworks services (Linux; Windows)
- system messages (log; viewing)
- System Updates
- template (device naming for registration; personality, creating; personality, modifying)

- third-party imaging
- ttp directory replication (Management Zone level, folder level, device level)
- uninstalling (Reporting server; ZENworks Server)
- UPD payload format
- user-defined fields, see administrator-defined fields
- user personality collection (applying; storing)
- user sources
- variables
- watch lists
- zac commands
- ZENworks Adaptive Agent (configuring; deploying)
- ZENworks Appliance (deploying; importing image; managing; monitoring)
- ZENworks Control Center
- ZENworks Explorer
- ZENworks services (Linux; Windows)
- zenworks.s
- zinfocollect utility
- zisedit
- zisview
- zman commands
- zmediacreator
- zmgexp
- zone (configuration; settings)
