

## ZENworks 2020 Update 2 Supported Capabilities by Platform

August 2021

The following table lists the ZENworks capabilities supported on each managed device platform.

|   | Windows<br>Workstation | Windows<br>Thin-<br>Client<br>Session*† | Linux<br>Worksta<br>tion | Macinto<br>sh<br>Worksta<br>tion | iOS<br>Mobile<br>Devices | Android<br>Mobile<br>Devices | Window<br>s Mobile<br>Devices | Window<br>s<br>Server | Linux<br>Server |
|---|------------------------|---|--------------------------|----------------------------------|--------------------------|------------------------------|-------------------------------|-----------------------|-----------------|
| Asset<br>Manage<br>ment                   | 0                      | 0                                       |                          |                                  |                          |                              |                               |                       |                 |
| Configur<br>ation<br>Manage<br>ment       |                        |   |                          |                                  |                          |                              |                               | •                     | •               |
| Software<br>Distributi<br>on<br>(Bundles) | 0                      | 0                                       | •                        | •                                | •                        | •                            |                               | •                     | •               |
| Configur<br>ation<br>Policies             | 0                      | 0                                       | •                        | •                                | •                        | •                            | •                             | •                     | •               |
| Remote<br>Manage<br>ment                  | 0                      |   | 0                        | 0                                |                          |                              |                               | 0                     | 0               |
| Preboot<br>Services<br>and<br>Imaging     | 0                      |   | •                        |                                  |                          |                              |                               | 0                     | 0               |
| Asset<br>Inventor<br>Y                    | •                      |   | •                        | •                                | 0                        | 0                            |                               | •                     | 0               |

|  | Windows<br>Workstation | Windows<br>Thin-<br>Client<br>Session*† | Linux<br>Worksta<br>tion | Macinto<br>sh<br>Worksta<br>tion | iOS<br>Mobile<br>Devices | Android<br>Mobile<br>Devices | Window<br>s Mobile<br>Devices | Window<br>s<br>Server | Linux<br>Server |
|--|------------------------|---|--------------------------|----------------------------------|--------------------------|------------------------------|-------------------------------|-----------------------|-----------------|
| Endpoint<br>Security<br>Manage<br>ment | •                      |   |                          |                                  |                          |                              |                               | Antimal ware only     |                 |
| Full Disk<br>Encrypti<br>on            | 0                      |   |                          |                                  |                          |                              |                               |                       |                 |
| Patch<br>Manage<br>ment                | 0                      |   | •                        | •                                |                          |                              |                               | •                     | •               |

<sup>\*</sup> User-based management capabilities (such as assigning bundles, Configuration policies, and Security polices to users) are supported only on Windows workstations and Windows thin-client sessions.
