

A LOOK AT FILE REPORTER

By the Numbers

Custom Query Report Types

Generate infinite Custom Query report types using SQL commands to specify what is included in the report.

10¹²

= Bytes In A Terabyte

File Reporter reports on terabytes of network stored data.

20

Built-in Reports

These reports cover areas such as storage costs, security, ownership, duplicate files, and much more.

4

Detail Reports

By simply clicking an entry in any of the File Data reports, the details of that entry are expanded in a new Detail report.

2

Databases Covered

You can use either a Microsoft SQL Server database or a PostgreSQL database (which ships with the product).

1

The One

Only one product in the industry today can simultaneously report on Novell and Microsoft network file system data and its security—only Novell File Reporter.
