

# Micro Focus GroupWise 2012

Micro Focus® GroupWise® 2012 brings customer focus to the forefront with an array of new capabilities and features that enhance the way you work and collaborate. It delivers a powerful set of tools with a highly dynamic and connected environment that takes personal productivity to a whole new level. GroupWise 2012 makes it easier than ever before to share, collaborate and get things done.

GroupWise 2012 provides a truly “plugged in” collaborative work environment that tackles information overload, mobilizes your productivity, transforms your contacts into valuable business currency, and lets you collaborate and interact across virtual and organizational boundaries.

Why enhance your collaboration efforts with GroupWise 2012? Here are ten reasons:

- 1. Manage information overload.** The GroupWise Home View gives you a personal productivity dashboard that consolidates dispersed information—including e-mail, calendar items, tasks, web panels, blogs, RSS feeds, Micro Focus Vibe® workspaces and more—into a single view. It brings together the collaboration tools and web applications you interact with most, and it lets you organize it all in the way that helps you work and collaborate smarter, faster and better.
- 2. Collaborate across virtual and organizational boundaries.** GroupWise simplifies cross-organization calendaring—even for organizations that use different messaging tools—by letting you subscribe to external calendars and publish your own calendar with free/busy information to external colleagues. As a result, scheduling meetings with participants from different organizations is a simple, streamlined process.
- 3. Transform static contacts into valuable business currency.** The powerful contact management capabilities in GroupWise let you readily access connections, conversation history, profile details and other important context that can improve your interactions and let you leverage your contacts to their full potential.
- 4. Turn your inbox into an effective way to manage business priorities.** GroupWise lets you prioritize tasks, visually see their percent complete, add subtasks and keep it all top-of-mind in a task panel in your Home View. You can even place any e-mails, appointments, reminder notes, phone messages or other item types into your Tasklist folder to make managing your priorities even easier.

---

## GroupWise 2012 helps you to be:

- More productive
- More mobile
- More connected
- More in control of your interactions and workload

---

**We're refocused on meeting customer needs with products that are built with engineering excellence at their core. Get the latest, most dynamic details about our plans for GroupWise—and the direct customer input that guides them—at: [www.novell.com/gwroadmap](http://www.novell.com/gwroadmap)**

- 5. Mobilize your data and productivity.** To mobilize user productivity, Data Synchronizer lets you synchronize emails, schedules, contacts, notes and tasks between GroupWise and your ActiveSync-enabled mobile devices. BlackBerry support is provided through our partnership with Research In Motion.
- 6. Reduce calendar clutter and scheduling headaches.** GroupWise 2012 introduces intuitive graphical busy searches, multi-user calendars with proxy account overlays, simplified recurring appointment creation, minimized redistribution of modified appointments and other efficiency-enhancing capabilities that reduce scheduling busy work so you can be more productive.
- 7. Enhance real-time and team interactions with Skype and Vibe integrations.** To support real-time communications with external colleagues, you can now see when your Skype contacts are online right within the GroupWise interface. You can then use this telephony framework to instantly interact with them via Skype SMS or Skype click-to-call. New integrations between GroupWise and Vibe also give team productivity a significant boost, such as drag-and-drop of items between GroupWise and Vibe folders, abbreviated folder lists and integrated search.
- 8. Simplify information sharing.** To make it easier to find, interact and share information with others, GroupWise 2012 incorporates a new relevance sorting engine that presents your most-used contacts, folders and categories first. It also lets you modify attachments and attach them to e-mail replies without having to save them and then browse to reattach them. It also gives you the ability to quickly share a complete folder tree and all its nested folders with others.
- 9. Be even more productive with the new web access interface.** The web access interface in GroupWise 2012 has been completely refreshed to give remote and mobile users more robust capabilities. It delivers recurring appointment creation, graphical busy-search, column sorting, consistent cross-client signatures, personal contact photos and group management capabilities. Additionally, the web access architecture has been streamlined to facilitate more frequent feature additions.
- 10. Enjoy greater mobile freedom with new iPad support.** Allowing you to be more mobile than ever before, the new web-based iPad support in GroupWise lets you access your GroupWise post office directly from your iPad so you can check and create new messages, appointments, tasks and more.

## About Micro Focus

Since 1976, Micro Focus has helped more than 20,000 customers unlock the value of their business logic by creating enabling solutions that bridge the gap from well-established technologies to modern functionality. The two portfolios work to a single, clear vision—to deliver innovative products supported by exceptional customer service. [www.microfocus.com](http://www.microfocus.com)
