

# Micro Focus GroupWise

Micro Focus® GroupWise® has always been a secure, reliable home base for workforce productivity. Now GroupWise 2014 R2 enhances the email you love with all-new features and increased support. With enhancements in all the places users work—as well as behind the scenes where administrators live—GroupWise 2014 R2 will help you get more done at every level of your organization.

## GroupWise 2014 R2 at a Glance

GroupWise is a complete email, calendaring, task management and contact management system that helps you be:

### ■ Mobile:

Enables users and admins to work from wherever they roam

### ■ Flexible:

Works with your current environment and interoperates with Mac applications and Outlook

### ■ Productive:

Offers new features that keep users working at peak productivity

## Getting Things Done Like Never Before

GroupWise 2014 R2 comes with enhanced mobile device support, new desktop features, new tools for administrators, and technological changes that will help your business run more efficiently. After all, email isn't about being flashy—it's about getting things done.

## Unleash a Mobile Workforce

Mobility doesn't just mean keeping your users moving, it means keeping them productive. To achieve this, we're also releasing GroupWise Mobility Service 2014 R2, the upgrade from GroupWise Mobility Service 2.1. With this new release, Microsoft Outlook fans can access Outlook from their mobile devices through official support of the ActiveSync protocol. This new release of Mobility Service also features the GroupWise Profile Setup tool and the ability to do busy searches in Outlook.

GroupWise 2014 R2 also features bidirectional synching for flagged messages: if you flag a message on your mobile device, the same

message will be flagged on your desktop and vice versa.

## Choice and Flexibility

The days of monolithic IT infrastructure are over. To provide email services in modern mixed environments, you have to be flexible. GroupWise 2014 R2 is lithe enough to mold itself to your organization.

The boss is sure to demand a system that will work with collaborators inside and outside your organization, so GroupWise interoperates with Microsoft Exchange, providing the ability to synchronize address books and perform busy searches across both systems. And it offers a clean, streamlined interface that adapts to user work patterns and offers unparalleled flexibility to make decisions on the fly—from adding a signature to selecting an item type to simply replying versus replying to all.

GroupWise doesn't just play nice with Microsoft. New support for CalDAV and CardDAV enables Apple enthusiasts to use their native

**In this modern era of data protection controls and regulatory oversight, GroupWise offers something many email packages can't: a secure, reliable and cost-effective solution that keeps your data on-premises and firmly within IT's control.**

Mac Calendar and Mac Contacts applications while continuing to enjoy existing support for the Mac Mail app—all while being connected to the corporate GroupWise system.

Support for Active Directory and KeyShield single sign-on (SSO) allows users to bypass the GroupWise login process. Not only does SSO offer convenience for users, but it also increases security because users can actually remember a single password—they won't need to keep a written list.

### **The Latest Tech for All**

The latest usability enhancements improve the fluid interface that GroupWise 2014 introduced. The following features will continue to increase productivity and help users stay on top of their loaded inboxes:

- The new Quick Responses feature offers predefined or custom responses that you can quickly send for emails that need only a fast and brief response.
- Now anyone who has received an event invitation can invite someone who wasn't included in the initial invitation. This new feature ensures that all essential personnel are included in events.
- The Propose New Time feature offers users the ability to deny appointment requests while suggesting a different day or time. With the assistance of a busy search, users can cut down on the back-and-forth of finding a time that's workable for everyone.

Users aren't the only ones who benefit from new technology in GroupWise 2014 R2. Support for the latest hardware, desktop operating

systems, browsers and mobile devices lightens IT's workload.

And with the assistance of the Ideas portal, our new enhancement request tool, we're also pleased to introduce a new feature that you requested: Auto Remove Proxy Access and Proxy Calendars eliminates the need to manually remove deleted proxy users accounts. Now, the GroupWise client will periodically check your proxy list to see if the users are still in the system. If a user account isn't in the system, the client automatically removes the user and sends you a notification when you open your proxy list.

The bottom line? GroupWise 2014 R2 continues to add significant value to your GroupWise investment. It is a comprehensive personal productivity solution that meets the needs of everyone from end users and business decision makers to the IT staff members that enable their success. It's a solution that offers the cost effectiveness and administrative ease of the cloud *without* transferring control of your data. It's a solution that gives you worry-free security and the ability to control your own compliance destiny. It's GroupWise 2014 R2, and it gets things done.

**“There's no contest between GroupWise and Exchange. Nothing is more secure than GroupWise.”**
