

Novell® Certification

Why should you put forth the effort to get certified? Certification proves to current or potential employers that you are a motivated learner and are committed to excellence in IT support. Our certification programs let you specialize in the areas most beneficial to your job and giving you a solid foundation in key technologies.

A Well-trained Staff: Essential to Your Bottom Line

At Novell, we are committed to the businesses that integrate our products and solutions. We provide you a full spectrum of training and certification opportunities to support the Novell® solutions that power your business. With Novell training and certification, you and your staff will be fully prepared to meet the complexities and challenges of managing your network while embracing its full business potential.

Certified Novell Identity Manager Administrator

The Certified Novell Identity Manager Administrator (CNIMA) is designed for new Novell customers and anyone administering identities in an enterprise using Novell Identity Manager 4. The learning materials in the CNIMA cover IDM 4 components and architecture, as well as implementing and administering those components. For more information, visit: www.novell.com/training/certinfo/cnima

Certified Workload Management Administrator

The Certified Workload Management Administrator (CWMA) is a new certification which validates skills necessary to

install, configure, use and troubleshoot the PlateSpin® Recon, PlateSpin Protect and PlateSpin Migrate products. For more information on Certified Workload Management Administrator, please visit: www.novell.com/training/certinfo/cwm/

Certified Novell ZENworks® Administrator

The Certified Novell ZENworks Administrator certification validates skills necessary to perform basic Novell ZENworks 10 Configuration Management administrative tasks, such as install, configure and deploy. It also validates skills to perform advanced administrative tasks associated with Novell ZENworks 10 Configuration Management, Asset Inventory Services and Patch Management Services. For more information on the Certified Novell ZENworks Administrator, please visit: www.novell.com/training/certinfo/cnza/

Novell Certified Linux Desktop Administrator 10

The Certified Linux Desktop Administrator (CLDA) is designed for candidates who are familiar with Windows* Desktop environments and desire in-depth knowledge on the innovative desktop operating system, SUSE® Linux Enterprise Desktop 10.
