

ZENworks 11 SP2

Test Scenario for Asset Management - Hyperlink-Document

This document contains a test scenario for ZENworks 11 SP2 Beta 1.

Purpose of this Test Scenario

The purpose of these exercises is to familiarize you with a new feature included in Asset Management.

Assumptions

We assume that you have followed the instructions for installing ZENworks 11 SP2 by using the *ZENworks 11 SP2 Installation Guide* (<http://www.novell.com/documentation/beta/zenworks112>).

Objective:

To create a ZENworks Asset Management document by using Hyperlinks.

Steps:

In some environments an administrator may require a link to documents instead of uploading them. With this feature you can create a Hyperlink to the document and then click on the Hyperlink to open the document.

1. Log in to ZENworks Control Center.
2. Go to *Asset Management* and then click *Documents*.
3. Click *New > Hyperlink*.
4. Enter a proper URL and then click *Next*.
5. Follow the steps mentioned in the wizard to create the Hyperlink.
6. In the Documents page, click on the name of the newly created Hyperlink.
It should open the link in a new window.

Expected Results:

- ☐ You should see the created Hyperlink in the document list.
- ☐ When you click the document name for the Hyperlink, it should open in a new window.

Logs:

If you are unable to successfully perform this scenario, send us the following logs:
