#### Summary

This document aims to offer a check list to control all available features provided by ZENworks Mobile Workspace Workspace.

## **ZENworks Mobile Workspace security layer**

| Feature                                      | Plat     | forms | Security consideration  |
|--|----------|-------|---|
| Integrity check                              | <b>É</b> | •     | Jailbroken and rooted device lost OS security mechanisms                          |
| Strong authentication                        | <b>É</b> | •     | User & application must be authenticated  |
| Second layer of encryption for communication | <b>É</b> | •     | OS TLS encryption maybe compromised (MitM, security flow)                         |
| Request validation                           | œ.       | •     | Request reaching ZENworks Mobile<br>Workspace are identified (USER-AGENT,<br>XSD) |
| Second layer of encryption for storage       | œ.       | •     | OS data encryption maybe compromised (no PIN code, jailbreak, security flow)      |
| Data leakage prevention (OS)                 | É        | •     | OS automatic screenshot, Pasteboard   |
| Data leakage prevention (User)               |          | •     | User screenshot, Pasteboard   |
| Live contextual rules                        | <b>É</b> | •     | Context must be process at each request not only at login                         |
| No root access, no credential storage        | <b>É</b> | •     | User data are accessed with user credentials                                      |

## **ZENworks Mobile Workspace MAM**

| Feature   | Platf    | orms | Security consideration                  |
|---|----------|------|---|
| Life cycle on unmanaged devices (No MDM profile req.) | <b>É</b> | •    | 1 On boarding of untrusted devices      |
| Enterprise store                                      | <b>K</b> | •    | Authenticated enterprise store          |
| Access control  | <b>É</b> | •    | Applications according to user's rights |
| Version control                                       | <b>É</b> | •    |   |
| Allow usage of standard MDM/EMM                       | <b>É</b> | •    |   |

## **ZENworks Mobile Workspace management**

| Feature                      | Platforms |   | Security consideration  |
|------------------------------|-----------|---|---|
| User management              | <b>É</b>  | • | Block and disenroll users   |
| Device management            | <b>É</b>  | • | Block, disenroll, access device logs and crash reports                  |
| Security policies management | <b>É</b>  | • | Life cycle control, cache control, key control, password change policy, |
| Access control list          | <b>É</b>  | • | Only internal computer can access administration consoles               |
| Role based management        | <b>É</b>  | • | Sensitive configuration must be handled by authorized users             |

## Mail

| Feature   | Plat     | forms | Security consideration                        |
|---|----------|-------|---|
| Refresh folders   | <b>K</b> | •     |   |
| See the number of unread emails in folder list view       | <b>K</b> | •     |   |
| Show email(s) in Inbox (after login)                      | <b>É</b> | •     | Limit maximum available mails                 |
| Show emails from the last days/weeks or month             | <b>K</b> | •     |   |
| Search an email   | <b>É</b> | •     |   |
| Move one or more emails                                   | <b>K</b> | •     |   |
| Flag read/unread one or more emails                       | <b>K</b> | •     |   |
| Delete one or more emails                                 | <b>K</b> | •     |   |
| Delete + Flag read/unread quick actions in mail list view | <b>K</b> | •     |   |
| Display mail content                                      | œ́.      | •     | HTML filter to avoid to supply malicious code |
| Emoticon sending and receiving                            | <b>K</b> | •     |   |
| Display next/previous email                               | <b>K</b> | •     |   |
| Automatic status change of unread email                   | <b>K</b> | •     |   |

| Feature   | Plati    | forms | Security consideration   |  |  |
|---|----------|-------|--|--|--|
| Display mail attachment (PDF, Images, Text)                       | É        | •     | Embedded reader to stay in the sandbox, server side access control (mime-type, size)   |  |  |
| Display mail attachment (MS Office)                               | <b>É</b> | •     | Embedded reader to stay in the sandbox, server side access control (mime-type, size)   |  |  |
| Attachment can be saved in Document                               | œ́.      | •     |  |  |  |
| New contact creation from email                                   | É        | •     |  |  |  |
| Call a phone number from an email                                 | <b>É</b> | •     |  |  |  |
| Reply to an invitation via email                                  | <b>K</b> | •     |  |  |  |
| Open web pages from email link                                    | <b>É</b> | •     | Embedded Browser to stay in the sandbox  |  |  |
| Compose a mail from mail address on HTML mail body                | <b>É</b> | •     |  |  |  |
| Add sender email to existing contact                              | œ .      | •     |  |  |  |
| Call a number from a phone number in an email                     | <b>«</b> | •     |  |  |  |
| Create a new contact from a phone number in an email              |          | •     |  |  |  |
| Write a new email   | œ́.      | •     |  |  |  |
| Add an attachment to an email                                     | <b>Ú</b> | •     |  |  |  |
| Save a draft  | <b>K</b> | •     |  |  |  |
| Send an email   | <b>K</b> | •     |  |  |  |
| Retrieve an email of a frequent contact tapping the first letters | É        | •     |  |  |  |
| Display number of unread emails on app icon                       | <b>K</b> | •     | Available only on following Android<br>devices: Sony, Samsung, LG, HTC,<br>Xiaomi, ASUS, ADW, APEX, NOVA,<br>Huawei, ZUK, OPPO, EverythingMe |  |  |
| Retrieve an email address while tapping the first letters         | <b>É</b> | •     |  |  |  |
| Retrieve an email address from address book                       | <b>É</b> | •     |  |  |  |
| Reply to an email (just to sender)                                | <b>É</b> | •     |  |  |  |
| Reply to an email (reply all)                                     | <b>É</b> | •     |  |  |  |

| Feature                                     | Platforms |   | Security consideration |
|---|-----------|---|------------------------|
| Forward an email with / without attachments | <b>É</b>  | • |                        |
| Clear frequent contacts locally stored      | <b>É</b>  | • |                        |
| Set a signature for outcoming emails        | <b>É</b>  | • |                        |

## Calendar

| Feature  | Pla      | tforms | Security consideration |
|--|----------|--------|------------------------|
| Refresh meeting list                                   | <b>É</b> | •      |                        |
| Show meeting list (after login)                        | <b>É</b> | •      |                        |
| Return to current day with "Today" button in all views | É        | •      |                        |
| Show multiday meetings                                 | <b>É</b> | •      |                        |
| Load older/previous meetings                           | <b>É</b> | •      |                        |
| Load future/more meetings                              | <b>É</b> | •      |                        |
| Show meetings of a selected day (month view)           | É        | •      |                        |
| Switch list mode / month mode / day mode               | É        | •      |                        |
| Change day and month in list mode (iPad)               | <b>É</b> |        |                        |
| Change month from list in month mode (iPad)            | É        |        |                        |
| Change year in month mode (iPad)                       | <b>É</b> |        |                        |
| Change month with swipe in month mode                  | É        | •      |                        |
| Change month with arrows in month mode                 | É        | •      |                        |
| Show a dot on days with meetings in month mode         | É        | •      |                        |
| Search a meeting                                       | <b>É</b> | •      |                        |
| Open a meeting   | <b>É</b> | •      |                        |
| Reply to an invitation from calendar                   | <b>«</b> | •      |                        |

| Feature                                       | Platf    | orms | Security consideration             |
|---|----------|------|------------------------------------|
| Create a new meeting from all views           | <b>É</b> | •    |                                    |
| Create a new all-day meeting from all views   | <b>É</b> | •    |                                    |
| Create a new multiday meeting from all views  | <b>É</b> | •    |                                    |
| Create a new recurring meeting from all views | <b>É</b> | •    |                                    |
| Edit a meeting                                | <b>É</b> | •    |                                    |
| Add/remove attendees to a meeting             | <b>É</b> | •    |                                    |
| See attendees status                          | <b>É</b> | •    |                                    |
| Delete a meeting                              | <b>É</b> | •    |                                    |
| Import meetings from native application       | <b>É</b> | •    |                                    |
| Export meetings to native application         | <b>É</b> | •    | Anonymization of confidential data |

## **Contacts**

| Feature                                       | Plati    | forms | Security consideration |
|---|----------|-------|------------------------|
| Show folder containing contacts               | <b>É</b> | •     |                        |
| Show all locally available contact            | <b>É</b> | •     |                        |
| One-time download of contacts                 | <b>É</b> | •     |                        |
| Filter contacts by category                   | <b>É</b> | •     |                        |
| Sort contacts                                 | <b>É</b> | •     |                        |
| Search contacts (local, server, GAL)          | <b>É</b> | •     |                        |
| New contact creation                          | <b>É</b> | •     |                        |
| Edit contact                                  | <b>É</b> | •     |                        |
| Show all available data of a selected contact | <b>É</b> | •     |                        |
| Emoticon                                      | <b>É</b> | •     |                        |
| Delete contact list                           | <b>É</b> | •     |                        |

| Feature  | Platf    | orms | Security consideration                      |
|--|----------|------|---|
| Delete contact from Edit                             | <b>É</b> | •    |   |
| See contact address on Google maps from Contact menu | <b>«</b> | •    |   |
| Send meeting invitation from contact                 | <b>É</b> | •    |   |
| Send SMS to contact from contact                     | <b>É</b> | •    |   |
| Send email from contact                              | <b>K</b> | •    | Embedded mail editor to stay in the sandbox |
